depends made by short sellers to get prices
down to a low level, by taking advantage of
the present lull in buying to start a selling
panic among the growers. It has not succeeded, however, and the growers show no
sign of losing their heads. It is true that
a large number of them are ready to sell
now, but they are not forcing their hops
on the market at sacrifice prices.

There is no reason why hops should be
selling as low as 23 cents in Oregon when
they are worth 40 cents and better in New
York State and 40 and 43 cents in England. The Waterville (N. Y.) Times of
September 26 reported sales of 500 to 600
bales at 40 cents and a fair-sized lot at
Cooperstown brought 42 cents.

The London market holds firm although the English buyers are not sending orders here. Ironmonger cabled from London yeaterday: "Market is firm but quiet. General expectation is that prices will go higher." Continental cables are also firm. Although there is an absence of export business on the local market, Western Washington has orders. Hugh Herren, buyer for a London house, freely offered 25½ cents in Western Washington yesterday without finding sellers. A Takima message reported a 25½ cent saie there.

Business has not entirely ceased in Oregon, however. Transactions are scattered, but there are enough of them to indicate a steady 25 cent market for choice hops. Buyers are, of course, paying less for lower grades. T. A. Livesiey & Co. are reported to have bought the Keiser, Nortness and other lots at Silverton at 25 cents and they have bought the Keiser, Nortness and other lots at Silverton at 25 cents and the White lot of 200 bales at 23 cents. WHEAT BUYERS OUT OF MARKET Regard Present Prices as Too High, but Farmers Will Not Accept Less.

Most of the wheat buyers were out of the market yesterday, except at reduced prices. Farmers were not disposed to accept these local bids, and consequently trading operations were on a very moderate scale. Buyers quoted full values as 79 cents for club, 80 cents for forty-fold and 89 cents

Bears Attempt Raid, but With In different Success-Bonds Hold Steady-Time Money Is

NEW YORK, Sept. 30.—There was no change in the speculative situation on the stock market today. There was no news and nothing from which to fashion even a rumor. But sentiment was decidedly bearish and stocks went down abruptly.

Traders talked about the tariff, alithough the probable extent of changes had been apparent for some time. With the effects of the new law as yet unknown, and in view of reports of lessening activity in various lines of industry, it was felt that bullish operations at present involved an extra hazzard. Reports from the steel trade, which is being watched most closely, told of further slackening in new business and during the day's decline, Steel was the especial target of traders on the short side.

A bear raid was attempted at the opening. Aside from a break of 1½ in Union Pacific, the list held fairly steady and such slight losses as were inflicted were made up before noon.

In the last half of the day prices gradually gave way, Union Pacific broke nearly three points.

Commercial paper was lower and time money developed a slightly easier tendency, in spite of the pendency of October 1 payments.

Bonds were steady. Total sales, par value,

Liberal Offerings by Canada and Large Russian Shipments Expected, Also Give Advantage to Bears at Chicago.

CHICAGO, Sept. 30.—World's available supply figures, showing an increase nearly double that of a year ago, acted as a weight today on the price of wheat. Although the market was steady at the close, latest quotations were \$40 to \$60 tower. Corn lost \$40 % to le net and oats \$40 to \$40 kc. In provisions the outcome was a decline varying from a shade to \$60. Most of the buying of wheat seemed to be merely for the purpose of covering short sales. Announcement was made that the world's available stock now exceeded last year's total by more than 25,000,000 bushels. Liverpool dispatches, telling of liberal Canadian offers and of big Russian shipments looked for, tended to give bears an advantage from the outset.

In the corn crowd general selling of September proved the main feature. Most of the business, however, was in small lots.
Oats had a heavy undertone. The reason appeared to lie in Canadian competition. Liquidating sales by holders eased the provision market. The only decided deciline, however, was in September pork.

The leading futures ranged as follows:
