Proposed Plant Basis. PORTLAND, Dec. 6.—(To the Editor.)—I notice that the city administration is figuring on issuing bonds to the extent of \$50.000 for a paving repair plant, and I assume that it is for the purpose of repairing the streets and it is a serious fact that some of our streets which have been paved with the "best material known," are saily in need of repairs. I am informed that when the paving comwith the "best material known," are sadly in need of repairs. am also advised that the city is now charter of Portland so as whether repairs are made or not, and I am also advised that the city is now paying large sums simually for this purpose, which in the minds of those unfamiliar with "financeering" would seem to come under a heading less which is receiving payment for repairs, why is it that lower Morrison and other worn out atreets are not repaired? Or, by any chance, are they waiting until a new payment is required?

It is just possible of course that the existence of a combine may be denied, but I would like to know if that is the case, why Fourth-street payement was let at a price of \$55,000, and that too, for Crossots treated blocks which are admitted to be inferior to carbo-

paving companies advertise their pave-ments to be the very best, and if they are, why do they not guarantee them for ten years also? Why should the tax payers be called upon to repair these streets every year or maintain a paving plant? If these companies cannot lay a pavement that they can guarantee why should the city not let the contract to the com-pany who does? The best is always the cheanest in the end.

It is a fact that the new railroad bridge was paved with the creosota treated wood blocks, by the railroad company which owns its own plant, but after the bridge burned, they repared it with carbolineum treated wood blocks, admitting that the latter added to the life of the wood and lessened the fire risk. the fire risk

I notice that in wet weather the hills are slippery and unsafe for horses where hard-surface pavement is laid, and even sanding does not seem to remedy the difficulty. Why doesn't the Humane Society insist upon the Commissioners laying wood blocks on Held During Week.

Dr. O. P. S. Plummer, for 49 Years Resident of Portland, Who Died Yesterday.

And just but not least, why don't the taxpayers compet all paving com-panies to guarantee and keep in repair the pavements laid by them, in the same manner that the Carbolineum Company does, and thereby lessen the laxes to some extent! THOMAS M'CUSKER.

Congregational Church Pasto Says Individual City and Nation Should Have Highest Ideals.

The desire for popularity either as an individual, as a city, a state or a nation should be dependent first of all upon the attitude taken and the in-dividual, city or nation should be judged not by the number of its enemies so much as by the character of its enemies, was the idea expressed by Rev. Luther R. Dyott, in his sermon esterday at the First Congregational hurch on "How Far Should We Care

What Others Think of Us?" "This applies to our own City of Portland," he said. "All false advertis-ing is to be deplored and should be corrected. Too many of our merchants are doing things that will not only hurt ousiness, but create faire impressions

about the city itself.
"We should go a step farther and condemn the fake doctors advertising to do things that they cannot do and all others who use the press for catch-ing the attention of the ignorant and credulous that they may prey them. All newspapers should d them. All newspapers should decline such advertisements, as two of our larger dailies have done already—and
