## BARK LEAKS BADLY

Hinemoa May Be Brought to This Port for Repairs.

DIVER REPORTS DAMAGE

Bulwarks on Port Side Suffer and Some of Vessel's Forestays Are Carried Away in Collision. Thistlebank Ready to Sail.

Leaking badly and with 20 plates cracked and broken, the British bark Hinemos, wheat laden for the United Kingdom and which was damaged at Astoria Sunday when she and the British bark Thistiebank came together through being swung by the wind, may yet be returned to Portland to be drydocked and repaired.

Following an examination made yesterday by a diver the full extent of the damage to her plates became known. It was first supposed that the starting of a rivet was responsible for a small leak discovered, but early yesterday the master reported an increase in the flow, yet no injury was located below the water line that was decreed responsible.

The bulwarks on her port side suffice of the starting of the flow, yet no injury was located below the water line that was decreed responsible.

decreed responsible.
The bulwarks on her port side suffered and some of her forestays were carried away as a result of the Thistiebank's jibboom having swung through them. It was understood last night that efforts would be made to find the last and if northly and if northly and if northly and its northly and its northly have reached to the control of the control o leak and if possible have repairs made at Astoria, it being reasoned that dam-age above the water line could be tem-porarily fixed so the vessel could pro-

ceed to Europe.

Captain Kennedy, superintendent 4n the North Pacific Coast for Andrew Welr & Company, owning the Thistle-hank, went to Astoria to look after her repairs. Her damage is reported to consist of a bent jibboom, the loss of a few stays and the denting of several plates on her starboard bow. Repairs were completed on her last night, however, and she will be ready for sea together.
