Only One Application And the Hairs Are Gone

(Aids to Beauty) (Aids to Beauty)

Here is a simple, yet very effective, treatment for superfluous hairs: With water, mix into a stiff paste enough powdered delatone to cover the objectionable hairs. Apply and let remain 2 or 3 minutes, then rub off and with it comes every bit of hair. The skin should then be washed to free it from the remaining delatone. This is a painless, inexpensive method and even a stubborn growth yields to the first application. The success of this treatment, of course, depends upon getting real delatone.—Adv.
