

FLAVEL IS CHOSEN AS HILL TERMINAL

Construction Work Will Start at Once According to Great Northern Head.

ROOM FOR 1000 CARS PLAN

Place Selected Three Miles West of Astoria With Frontage of 3800 Feet on Columbia River Part of Railroad Subsidy.

ASTORIA, Or., April 10.—(Special.)—"Our proposed big steamship wharves and terminals are to be located at Flavel and construction work on them will be commenced in the immediate future." Such was the announcement made this morning by Louis W. Hill, president of the Great Northern Railroad Company, who with a party of other railroad officials and financiers of St. Paul passed a few hours in the city today.

"That is the logical point for this development," continued Mr. Hill, "on account of the advantages it offers for economy in construction and as a desirable site for the quick dispatch of trains and steamships. We have decided to utilize that location as being for the best interests of all concerned. We do not wish to be understood as favoring any particular location for the building of these docks further than to justify the most adequate means to handle our traffic and make provision for a greatly increased trade."

"This is an Astoria proposition and the people should get together at once and make the entire Lower Columbia River district one."

While not going into details, Mr. Hill intimated that the plans for the docks are practically ready and the structures will be on a mammoth scale with yardage facilities sufficient to accommodate not less than 1000 cars. He said that while the contract for the two ocean greyhounds now being built at the Cramp yards in Philadelphia calls for the vessels to be finished in January, the company expects a delay of a month or two in the delivery, but the docks will be ready by the time they arrive.

The site selected by the Hill system, three miles west of this city, is included in the confines of the Port of Astoria and is what is familiarly known as Tanny Point. The property was a portion of the subsidy given to A. B. Hammond at the time he built the railroad and it was selected for Mr. Hammond by the late Collis P. Huntington, then president of the Southern Pacific. The tract comprises 3800 feet of frontage on the Columbia River and is looked upon by railroad men as among the most valuable assets under the control of the Spokane, Portland & Seattle.

During their stay in Astoria, President Hill and party were taken in automobiles to various points about the city and at 10:30 their special train left on the return trip to Portland.

HILL OFFICIALS ARE BACK

Executive of Great Northern and Party Go to Seattle.

L. C. Gilman, president of the North Bank and other Hill lines centering in Portland, returned yesterday after accompanying the Hill party from Astoria and Flavel to Vancouver, Wash. A. M. Lapeere, chief engineer, W. D. Skinner, traffic manager, and George H. Smitton, assistant general freight agent of the Great Northern, returned yesterday from the Astoria trip.

The remainder of the Hill party went direct to Tacoma and Seattle without re-entering Portland. Mr. Hill plans to devote about three weeks to the trip from Seattle to St. Paul, as he wants to inspect all parts of the line thoroughly. Mr. Gilman yesterday declared that the Hill interests have been considering Flavel as their terminal site for a long time, but that it awaited the visit of L. W. Hill to determine its final selection. Plans for the docks have been completed, he said, and the work will proceed to permit their use promptly upon inauguration of steamship service between San Francisco and the Columbia River.

BULL MOOSE WORRIED

ASPIRANT FOR GOVERNOR OF IDAHO ANTI-PROHIBITIONIST.

Party Leaders Make Discovery Just When They Are Preparing to Adopt Slogan of Making State Dry.

LEWISTON, Idaho, April 10.—(Special.)—There is great consternation in the ranks of the Bull Moose. It has just leaked out that John P. Vollmer is "wet" through and through in his convictions, just at the time when the Bull Moose leaders were about to raise the standard of statewide prohibition as the principal plank in their platform.

Through the activities of the local party leaders, reinforced by the persuasive powers of George W. Perkins, Mr. Vollmer was induced to say that if his health permitted he would make the race for Governor as a Bull Mooseer.

As Mr. Vollmer is the "largest individual taxpayer in Idaho" there was naturally great rejoicing over the prospect of his candidacy, especially as Mr. Humbird had refused to run for the Senate. But right at the critical point Rev. W. J. Herwig, who is leading the state-wide "dry" campaign in Idaho, dug up the information that Mr. Vollmer is an uncompromising "wet" and that while he has never taken an active part in the liquor fights in his own immediate community, he has never left any man in doubt as to where he stood on the issue of prohibition.

Representatives of the Bull Moose organization here have made no definite statements, as they are awaiting the big Progressive meeting to be held here next Monday. Some of the men in charge of the party say the liquor issue may be eliminated from consideration during the campaign in order not to embarrass Mr. Vollmer, while others of equal authority have expressed themselves that it will be necessary for Mr. Vollmer to pledge himself to statewide prohibition for the campaign in order not to embarrass the Bull Moose.
