Objects of Organization Explained by Officers-Series of Exhibitions and German Fair to Mark Opening.

Though the official opening of the Portland Social Turnverein will not take place until next Sunday, representatives of the Portland press, both English and German, were taken through the building yesterday by the officers. The inspection was followed by a banquet for the officers and

Though the plans of the new building indicated that it would be one of the most beautiful plants of its kind in the city and Northwest, it took a trip through it to show just what Portland's first athletic club has given to the city. The Portland Turnverein was organized in 1858. Its membership was always limited because of the lim-ited accommodations.

Now the Turnverein has a building

able to care for a membership of sev-eral thousand, but that building will soon be taxed at the rate members are

joining. Dr. F. H. Dammasch acted as the escort for the visitors. One of the fea-tures of the building will be the im-mense hall on the third floor. This hall will serve for the dramatic socie-

The banquet served as a means of acquainting the visitors with some of the objects of the club. Dr. Dammasch acted as chairman.

"In every community where the Turnverein is established, the organ-fation is always a big civic factor for the good of the city. Its membership is democratic in principle," said Dr. Dammasch.

"While of German extraction, its membership is open to all nations. We believe that the very principle of the institution leads toward the betterment of the city.

of the city.
"While the Turn Verein is essentially athletic by nature and origin, its fields of endeavor are many. It is

everyman's club."
Rudolph Hochuli, captain of the gymnasium teams, spoke of the German system of athletics as practiced by the

Turn Verein. The German system teaches the development, not of the unit, but of the class," said Mr. Hochuli. "While the Turn Verein occasionally develops the specialized star, its object is the bringing out of the drilled class of athletes.

"The juniors from 5 years up are drilled until they become the apparatus experts at 18 to 25.
"This does not mean that we overlock the elders. Special work is outlined for them."

A pleasing part of the banquet was se musical accompaniment by the buble quartet. Other speakers were: W. P. Strand-

GILMORE SANCTIONS GRAB

Federals Only Retaliating in Taking

Hamilton and Clemens.

NEW YORK, April 12.—"A vindication," is the way President James A. Gilmore, of the Federal League, yesterday alluded to the decision of Federal Judge Sessions, in the Killifer case at Grand Rapids, Mich. Gilmore explained why the Federals have induced, as plained two St. Louis American as claimed, two St. Louis American players. Hamilton and Clemens, to jump to Federal League clubs of his organization. It was simply a case of retallation, he said.

retaliation, he said.

"Organized baseball went after players who had signed with us, the Kansas City team suffering in particular," Gilmore asserted. In all, five players were taken from the Federal League clubs, to which they had bound themselves by signed contracts. Naturally, we might be expected to be entitled to the same procedure, so I gave permission to our clubs to go out and get one signed player for every signed Federal Leaguer who might be taken from us. That is why we have taken Hamilton and Clemens."
