COLONEL ROOSEVELT'S OFFORTUNITY. Colonel Roosevelt's criticisms or the foreign policy of the Wilson Ad ministration have put into straight-forward language thoughts which have been in many men's minds in more or less definite form. A feeling of uneasiness and dissatisfaction is widespread at the muddling of Mexi-can affairs, the proposal to back wa-

The case against the bi-cameral Legislature is set out in the Saturday Evening Post by Governor Hodges, of Kansas, perhaps as effectively as it can be, and yet his article does not convince us that the average Legis-lature has a lower sense of duty and responsibility than the people it represents or that a change would cause the people to elect a law naking body more interested in the public welfare than they are them-

A reaction against Bergson's popu lar philosophy is well under way in the European world of letters and science. Most readers have probably felt the presence of something Jesultical in his arguments. His persistent denigration of intelligence and exaltation of "intuition" would lead us straight back to witchcraft if it were not combated. The reaction ha come none too soon.

They became engaged almost at once, but Huxley's son and biographer afterward wrote: "For her he was to serve longer and harder than Jacob thought to serve for Rachel, but who was to be his help and stay for 40 years, in his struggles ready to counsel, in adversity to comfort; the critic whose judgment he valued above almost any, and whose praise he cared most to win."

The engagement insted nearly eight years. At first came separation, caused by the successive exploring voyages of the Rattlesmake, on one of which the young surgeon was only kept back by his captain's orders from joining Kennedy's ill-fated expedition through the push to Cape York. The Rattlesmake returned to England near the end of 1850, and Huxley did not see his future wife again for nearly five years more. 1850, and Huxley did not see his future wife again for nearly five years more. It was arranged that their marriage should take piace when Huxley was promoted to the rank of full surgeon, but promotion was not so rapid as he expected, and the difficulty of obtaining a decent position in England in reasonable time seemed almost insuperable. Although the young inventigator leaped at once into the front ranks of science and was elected F. R. S. at the age of 27, this was, as he said, "distinction: but not bread."

Miss Heathorn returned to England with her parents in 1855, when Huxley had attained some of the more solid rewards of science and had been elected to a professorship at the Royal

As a member of the profession he asked the specialist's candid opinion of the case. "I give her six months of the case. "I give her six months to live," was his deliberate epinion. "Will, six months or not," replied Huxley, "she is going to be my wife." Those who are given a death sentence by a doctor may take courage from the fact that Mrs. Huxley bore her husband three sons and four daughters, and lived 58 years and a half in excess of the time allotted to her by Harley.
