EAST IS INTENSELY HUMID

Thermometer Registers 100 on Washington Streets; Atlantic and Middle Western States Suffer in Unison.

WASHINGTON, May 28.—A wave of intense midsummer heat, accompanied by enervating humidity, settling over the Atlantic States and the Ohio and the Middle Mississippi valleys...

In Washington the enclosed thermometers at the elevated Weather Bureau registered 95 degrees, while those in the streets marked 100, the official figure within one degree of the record for the warmest May day since 1870.

Several Cities Affected. In many cities throughout the East the temperature reached a point only one degree lower than that in Washington.

Slightly cooler weather was promised the East during the remainder of the week by Bureau experts tonight, but the indications are that real relief will come only Friday, when a disturbance swooping down from the Northwest may bring general thunder showers.

INDIANAPOLIS, May 28.—Two persons were overcome by heat here yesterday. At Lafayette the Government thermometer registered 95, with 102 on the street level.

A 16-mile-an-hour wind accompanied the storm. Four deaths were reported as being due to the heat in this city. The maximum temperature was reached at 1 o'clock, when the thermometer registered 94.

Six hundred inmates of the House of Correction became terror-stricken when a bolt of lightning set fire to the laundry building of that institution. Fifty inmates were released to assist in checking the blaze. The loss was estimated at \$25,000.

DAMAGE PUT IN THOUSANDS. Lightning Destroys 25 Buildings as Flames Follow Bolts.

ARMOR PLATE PLAN FAILS. Senate Strikes Out Provision in Bill for Proposed Federal Project.

WASHINGTON, May 28.—Authority for an investigation and report by the Secretary of the Navy on the Government armor plate factory project, inserted in the naval appropriation bill by the Senate committee, was stricken out in the Senate today on a point of order by Senator Oliver.

Previously, Senator Ashurst, denouncing the armor plate manufacturers as "the most odious, crushing, devastating monopoly in the United States" had sought vainly to have the bill authorize the erection of a \$4,000,000 Government plant in the event the Navy Department failed to secure reasonable bids on armor from the manufacturers.

In a few hours the Senate disposed of most of the committee amendments and paved the way for an early vote on the appropriation bill.

An amendment striking out the stipulation that one of the two battleships provided for be built in a Government Navy-yard went over until tomorrow.

Committee amendments to the bill as it passed the House, agreed to today, included provision for exempting from tolls vessels using the Panama Canal in connection with the Panama-Pacific Exposition.

WAR DEPARTMENT GETS NEWS OF COLORADO OUTBREAK. Federal Sentinel at Segundo, in Wilsonburg District, Reports Soldiers' Cause to Spare Colony.

WASHINGTON, May 28.—Colonel Lockett, commanding the United States troops in the Colorado coal fields, reported to the War Department today details of the first exchange of shots between the Army and strikers, which occurred Monday night.

Secretary Garrison gave out this statement, based on Colonel Lockett's report: "One of our sentinels on a detached post at Segundo, a place about 35 miles south of Wilsonburg, in the Trinidad district, was attacked about half past 10 on the night of May 25 by two men with firearms. Considerable disorder ensued. A full investigation was made and it was found that one of the attackers fired from the strikers' colony in the vicinity and the other, after firing, retired into the colony. The return fire on the strikers and pursuit of them by soldiers ceased because of danger to the other occupants of the colony."

"The heads of the strikers' colony were requested to produce the persons of the two offenders."
