Splendid receptions and demonstrations at La Grande and Baker City, Hoquiam and Huntington were enjoyed. A quarter of an hour extra time was given at La Grande and Baker City for entertainments and an automobile ride. The time was made up by the veteran engineer, John Gardner, to whom Queen Thelma presented a huge bouquet when the party left the train at Huntington.

MORE FOOD COMES

Imports Increase, Exports Decrease, Report Shows.

HOME DEMAND IS GREATER

Less Than Half as Much Crude Food Products Sent Abroad as Under Former Dispensation—Beef and Grain Coming In.

WASHINGTON, June 2.—With the home demand for domestic foodstuffs almost equaling production, the United States is not only reducing its exports, but is increasing its imports of certain foodstuffs. This is one of the striking features of a review today by the Department of Commerce of the foreign trade during the first six months under the new tariff.

Figures show that imports of foodstuffs in their natural condition, including food animals, increased from \$117,194,237 in the half year ended with March, 1913, to \$143,421,626 during the corresponding period this year, and that imports of foodstuffs, partly or wholly prepared for use, in the same period increased from \$95,744,241 to \$109,967,378.

The increase in importation of all food products in the period named approximated over \$50,000,000, or an average of \$5,000,000 a month. Figures of exports are even more striking. Of crude foodstuffs, exports fell off more than 50 per cent, while prepared foodstuffs also declined. Exports of crude foodstuffs fell from \$117,194,237 in the six months period of 1913 to \$56,483,787 in the corresponding period this year, and manufactured products from \$189,007,422 to \$162,932,825.

Food articles showing largest increases in importations were beef cattle, corn, wheat, rice, macaroni, fruits, molasses and edible oils.
