Square Rigger Comes From Callao in 40 Days.

PASSAGE IS NEAR RECORD

Alcides Takes Only One Day More Than Inverlogie Did in 1911. Cortez Is Chartered to Work Grain Here in October.

Sailing within one day of the record passage for square-riggers, the Norwetrance to the Columbia yesterday after a run of 40 days from Callao. She is under charter to Strauss & Co. to load old crop barley here for the United

under charter to Strauss & Co. to load old crop burley here for the United Kingdom.

The Alcides was picked up by the tug Oneonta and at 5 o'clock last evening was 29 miles west of the bar, heading in. She put out from Callao May 13 and was evidently favored by wind on most of the voyage. The British bark Inverlogic covered the distance in 39 days when bound here in 1911 to load grain, and her run is regarded as the best done by any of her class in recent year. The record is credited to the schooner Oliver Olson, which made the Columbia from Callao in 33 days.

The Norwegian ship Cortez has been chartered by Balfour, Guthrie & Co. at going rates to work grain here in October. The vessel is of 2155 tons, net register, and sailed from Newcastle, N. S. W., April 23 for Colral. Exporters say there has been made to charter steam tonnage with the proviso that if the Panama Canal is open by the time the vessel is loaded a lower rate will be provided for dispatching her via the new route, but without avail.

So far as can be ascertained, owners are making no move toward designating Panama Canal rates. Those owning sailing vessels are taking advantage of active chartering that has been goin, on for loading up to January I. 1915. Though the largest fieet is under engagement that has been fixed at a corresponding period in a dozen years, exporters are optimistic in saying that even more tonnage will have to be secured to care for the crop. Dependence is being placed to an extent on steamers that will go via the Canal after the new year opens.

SAMBIA IS BEING REPAIRED

Liner Makes Shanghai Under Own

Power, Water Gaining on Pumps. information first forwarded to Fritz

Anformation first forwarded to Fritz Kirchhoff, Portland agent of the Hamburg-American, that cargo from Europe and Oriental ports for the Pacific Coast, aboard the liner Sambia, had not been damaged when she struck on Shadow Island May 18, has been confirmed. It is further understood that the principal repairs consist of several plates being renewed and as the work is under way at Shanghai, the vessel may be returned to her schedule.

Officers of the Canadian Pacific liner Empress of India, which has reached Vancouver. B. C., bring reports that the Sambia was under way in a dense fog and it was 7:30 A. M., when she brought up on rocks bordering on Shadow Island, which is to the eastward of Wenchow and about 200 miles from Shanghai. Immediately on striking, the englines were reversed and the vessel backed clear. When the fog lifted it was decided to proceed on the course to Tsingtau, but as the water was gaining on the pumps and reached the bunkers, the master altered his course and headed for Shanghai and was gaining on the pumps and reached the bunkers, the master altered his course and headed for Shanghai and sent out wireless calls for aid. After a few hours the steamer Saratoga answered and relayed the call of the Sambia to Shanghai. While preparations were under way at the latter port to dispatch a vessel, the Sambia hove in sight. On being borthed there The liner Saxonia is bringing

Voyage Starts and Terminates Unfortunately for Lumber Carrier.

Speculation as to the slow passage of the schooner Nokomis, lumber laden from Portland for Payta, Peru, ended yesterday with the recelpt of news by the Merchants Exchange that she was wrecked on Clipperton Island, about 150 miles west of Panama, February 28, her crew being saved. She was owned by George E. Billings, of San Francisco, and was chartered to Otis McAllister, of San Francisco.

The Nokomis put out from the Columbia River January 17 and virtually from the time she got her first slant until she limped into Port Townsend. Several days later, she battled with a granting renewals to Pilots John Petgranting renewals to Pilots Jo Speculation as to the slow passage of

City Hires Gang With Scythes to Do Mowing.

CAMPAIGN TO BE PUSHED

As Work Is Progressing Inspectors Are Posting Notices on Other Lots-Fuss Expected When People Get Bills.

Following up the anti-weed campaign started by the city about ten inys ago, 21 men, equipped with new scythes, were put to work yesterday mowing the grass and weeds on vacant property, where the owners have refused or failed to do the work. The men selected for the work are experts with the scythes, and a large number of lots were cleared during the day. The work will be kept up from now until the middle of September with increased vigor. Additional men will be put to work almost daily.

The scene of operations yesterday was on vacant property in the district bounded by Stark street on the north, Hawthorne avenue on the south, Grand avenue on the west, and East Thirtieth street on the east. They will gradually work out toward the suburbs, cutting all weed patches as they so.

Law Complied With. scythes, were put to work yesterday

Law Complied With.

The property on which work is being done is that upon which "cut-weed" notices were posted more than five days ago in compliance with the city ordinance. There are about 700 lots on which the time limit for cutting has expired and upon which the work will be done by the city at the expense of the preparty owners as soon as the the property owners as soon as the force of workmen can reach them. As work is progressing inspectors are out posting notices on other property.

The activity of the city has had its

The activity of the city has had its effect upon various property owners. Weed cutting by private contract or by property owners is in progress all over the city. In some cases large owners of property have put men to work, thus staving off the city laborers who would have done the work. In many cases the cutting has been done promptly upon the posting of a notice by the city.

Many Issuer Natices.

Many Ignore Notices.

In many other cases the property owners have ignored the notices. A lively fuss is anticipated when these people get their assessment notices, it is said that the actual cost of cutting the weeds under the city's system will be added \$2 to cover the overhead cost, making the total cost about \$2.75 a lot. By private contract, it is said, the work could be done for much less.

This is the first year the weed-cutting ordinance has been enforced to the letter and enforced throughout the city. Last year there was much work of this kind, but it was confined to a few districts. It is the plan this year to reach every weed patch in the city at least once during the Summer.
