

The Oregonian
PORTLAND, OREGON.
Entered at Portland, Oregon, Postoffice as Second-Class Matter, June 16, 1881.

has its way? Hasn't the stubborn old tippler, Huerta, outmaneuvered the Administration at every turn? Hasn't as Colonel Roosevelt says, our diplomacy become the laughing stock of this world?

OUR TRIUMPH.
The Niagara protocol is fervently described by the enthusiastic newspaper correspondents as a "great triumph of Pan-American diplomacy."

BRIGHTER DAYS?
A newspaper letter-writer, in discussing the recent proposal to restore the convention nominating system and the other proposal, from the same source, to head off the single tax by the two-thirds rule, gives this illuminating insight into the prospect of his motives: "I do not expect his prediction and surmises, except his prediction and surmises, but it still is the bogey by which the soap-boxers, the socialists, the I. W. W., the single-taxers and all the other adullamite apostles of the newest political "thought" hope to alarm the people."

WHY A GREAT FIRM FAILED.
The primary cause of the Clafin failure is given as "over-extended credits." No doubt, there is no suggestion of mismanagement, or dishonest management. The firm, greatest and oldest in dry goods in the United States, had sought to adjust itself to changing business conditions in New York by enlarging its operations throughout the country and by direct financial support of retail stores in many cities. The load became too great to carry. The concern collapsed.

SUPPOSING IT IS PSYCHOLOGICAL.
In the Oregonian yesterday was published a letter which induces us to revert to the assertion made by President Wilson that the cause of depression or depression is psychological. This contributor said: "The best government is that which gives us the maximum attainable prosperity, and when the prosperity is in the hands of a few, the government is compounding a felony. If we have not wronged her we should not pay the most infinitesimal fraction of a dollar."

WHY A GREAT FIRM FAILED.
The primary cause of the Clafin failure is given as "over-extended credits." No doubt, there is no suggestion of mismanagement, or dishonest management. The firm, greatest and oldest in dry goods in the United States, had sought to adjust itself to changing business conditions in New York by enlarging its operations throughout the country and by direct financial support of retail stores in many cities. The load became too great to carry. The concern collapsed.

AND NOW JAPAN.
Japan is beginning to stir uneasily again over the California anti-alien law. It is announced that the issue is to be forced, that after many months of smouldering diplomatic inactivity, Japan will seek to bring the matter to a climax. Arbitration is hinted at, although Japan's full purpose is not made quite clear at this time in spite of announcements that the ancient dispute will consist of baring past secrets. All correspondence between the two countries bearing on the topic will be given to the public in Japan and the United States simultaneously.

THE SCIENTIFIC HONEYARD.
Scientists, when not fully occupied in discovering some entirely new and startling fact, are happiest in upsetting the facts and fancies of yesterday. It would seem that as soon as the world in general has accepted some new theory, its usefulness has been exhausted. It is then obsolete and fit material for the scientific honeyard and in an idle moment the scientists give it a push. The regulation of the whole universe is changed every few years, at least so far as man's conception is concerned.

It would seem that as soon as the world in general has accepted some new theory, its usefulness has been exhausted. It is then obsolete and fit material for the scientific honeyard and in an idle moment the scientists give it a push. The regulation of the whole universe is changed every few years, at least so far as man's conception is concerned.

SEEKING BY PHONE.
Very soon we are to be able to see over the telephone, so word comes from the workshop of an English inventor who has demonstrated that he can transmit the necessary vibrations and impressions from point to point over a small wire there where no such intricate work in the past, but they did not work out. This one is said to be along entirely new lines and to solve the problem fully and completely.

WHY A GREAT FIRM FAILED.
The primary cause of the Clafin failure is given as "over-extended credits." No doubt, there is no suggestion of mismanagement, or dishonest management. The firm, greatest and oldest in dry goods in the United States, had sought to adjust itself to changing business conditions in New York by enlarging its operations throughout the country and by direct financial support of retail stores in many cities. The load became too great to carry. The concern collapsed.

30 BILLS FOR THE PEOPLE
Proposals for the State Election of 1914 Under the Referendum.
The following summary of proposed measures to be submitted to the people of Oregon, under the initiative and referendum laws, is made by the Non-Partisan League. It is not probable that all will be on the ballot, however, though declarations have been made by the Secretary of State in accordance with law:

HONOR TO A FAMOUS DANCER
Flowers and Tears at Mrs. Gene's Farewell. She's 30 Years Old.
London, June 25.—Mrs. Gene, the famous dancer, has sailed for London for her farewell tour. She is 30 years old and has been in the business for 15 years. Her tour will include a stop at Portland, Oregon, on her way to Australia.

OVERCROWDED LABOR MARKET WOULD BE GLUTTED, Says Labor Council.
PORTLAND, June 25.—(To the Editor.)—The following resolution was adopted by the Central Labor Council at the regular meeting, June 5. It is the desire of organized labor that these resolutions be published in the Oregonian. It is hoped that you will favor us with the same.
MARK WILLIAM PETERSEN, Secretary.
