### LAKEVIEW IS CLEARED UP

Only Stock Remaining Is in Willamette Valley and This Is Fast Being Disposed Of-Advances at London Sales.

Except for a few small stray clips at scattered points Eastern Oregon is cleaned up of 1914 wool. The Southern Oregon is cleaned up of 1914 wool. The Southern Oregon supply has also passed out of first hands. Practically all the wool that is left in the state new is in the Willamette Valley, and the quantity remaining there is small. Growers are holding but little of it, and country merchants' stocks are much reduced. Buying in that section has been fairly active in the past week at unchanged prices, ranging from 18½ to 20½ cents,

strengtened by the higher prices paid at the London July sales. Transactions in Western wools at Boston during the past week included a considerable quantity of Oregon Valley wool at private terms. One Oregon Valley wool at private terms. One

Market Wenkened by Slump at Eastern and Foreign Points.

Wheat buying has slowed down materially. So far as could be learned, few quotations were sent into the country yesterday. Most dealers were inclined to consider 77 cents as the outside price of new club. Mill buying was not in evidence, and oriental purchasers indicated much lower prices. A

Indications That Demands of Importing Countries Have Been Well Filled for the Present-Rust Reports Are Numerous.

CHICAGO, July 14.-Despite increasing damage from black rust, the wheat mar-ket today finally took a downward turn, wing to export bids being out of line. The close was nervous, 16 914c to 5c under last night. Corn showed a net loss of 16 5c to 1815c, and oats of 5c to 1825c. In provisions the outcome varied from 57 15c decline to a rise of 15c.

Wheat speculators found plenty of signs that the demands of importing countries had been well filled, at least for the present. Reports of black rust damage to wheat in South Dakota were more numerous and positive than heretofore.

Corn values dropped, owing to a breaking of the drouth in parts of the Ohio Valley.

Oats felt the bearish influence of increasing receipts from the new crop.
