LECTURE ON DRAMA GIVEN H. H. Brown, M. A., Says Courage of

Women Is War's Need.

"Woman's courage is the kind of courage needed, for it is the kind that leads unto life. Man in the past ages had to fight, but today, with this horhad to fight, but today, with this hor-rible conflict going on in Europe, there is growing every day a deeper convic-tion that this is all so unnecessary. This will, I predict, be the last great

war. Co-operation, not destruction, should be the thing."

This was expressed yesterday morning by Alfred E. Brown, M. A., who gave an address on the drama in the ballroom of the Hotel Multnomah.

Mr. Brown took as his inspiration
the play "The Terrible Meek," by Kennedy. He depicted cleverly and elo-quently the dramatic incidents pre-

sented by the playwright and spoke of the drama as an art, the function of which is to interpret life as it is lived. His philosophies and deductions were woven into the lecture on Kennedy's unusual play. This is the first of a series of lectures Mr. Brown is giving in Portland. The next lecture will be delivered temperature when delivered tomorrow morning. "The Mark" will be the topic

CAR ROBBERIES CHARGED

Held, Accused of Stealing Wheat, Believed Members of Gang.

Robberles from box cars at the O.-W. R. & N. Company's yards in Albina believed to aggregate several thousand dollars in value have been going on in recent months, believed to be the work of an organized gang of thieves. Two men suspected of being members of the gang were arrested and bound

over to the grand jury yesterday.

William Spencer, said to be 17 years old, and William Washbourne, 38 years old, were caught in the railroad yards after dark by Special Agent Bakscy. Spencer ran and Bakscy handcuffed Washbourne to a box car while he pursued and captured Spencer. It was alleged the two men were stealing wheat from a car.

According to Baksey, the gang, of which Spencer and Washbourne are suspected members, has been breaking into box cars, stealing sacked wheat, brass, copper and other things. It would then carry the loot to a trestle further down the track and lower it into a steam launch with the aid of a long rope, he said.
