Mrs. Stubbs Declares Fight Is One of Expediency and Practical Politics.

PAST TURNDOWN IN MIND

Suffrage Leader Declares Congress ional Union Is Out to Defeat All, Including Chamberlain. Indorsement Predicted.

"We are nothing but practical poli-nane," insists Mrs. Jessie Hardy Stubbs, present chairman for the Con-

scubs, present chairman for the Congressional Union for Woman Suffrage,
who will speak at the Public Library
tonight in opposition to all the Democratic candidates for Congress.

No, there is not a bit of sentiment
connected with our fight. The Democrats have turned us down at Washington and now we are out to defeat
the Democrats. It is not revenge that
we are after, but results," said Mrs.
Stubbs.

"All that we want is suffrage. The Democrats have given us to understand that we can't get it while they are in office, so we have set out to get the Democrats out of office.

"Any practical politician will recognize that as political expediency."

Case of Fight-Back Type. Then Mrs. Stubbs read extracts from current reports of Congressional activity to show that "political expediency" largely governs the motives and actions of all political parties in framing legislation.

It so happens, she explained, that the Democrats are in power at Wash-ington. If they have considered it ex-pedient to ignore the appeals of the suffrage organizations in their efforts suffrage organizations in their efforts to adopt a resolution providing for a suffrage amendment, Mrs. Stubbs and her co-workers propose to show the Democrats that they acted unwisely.

"Yes, we expect to make it so hot for the Democrats in this campaign that they will be forced to place a suffrage plank in their platform two years from now," Mrs. Stubbs declared.

"But I warn them that then it will be too late—too late. be too late-too late.

General Indorsement Predicted. "I predict now that everyone of the parties-Democrats and Republicans, as well as the Socialists and Progressives—will indorse equal suffrage at its National convention in 1916. The Socialists long have been with us. The Progressives had a suffrage plank two years ago, but it wasn't because they were crazy about suffrage. It was political expediency—that's all.

"I know about that Progressive plank, for wasn't I at Oyster Bay for seven months and didn't they have to talk to Colonel Roosevelt for nearly that whole time to convince him that it would win some votes to indorse

'Now, if the Republicans and Demo crats indorse suffrage two years from now, it won't be that they love suf-frage. It will be through political ex-pediency. We know that, but we don't care what are their motives, so long as we get it. Get it, that's all we want.

of Congress is but a cog in the ma-chine. He is helpless. We are op-posing Senator Chamberlain in Oregon merely because he happens to be a member of the party that turned us down. We are treating him entirely

Return From Five-Year Trip in Arctic, Holds Hope of Reaching Banks Land Slight.

NOME, Alaska, Sept. 22.-Captain Joe Bernard, of the schooner Teddy Bear, who has just returned from a five-year trading and exploring voyage in the Arctic Ocean, fears that Vilhjalmur Stefansson, Ole Anderson and Stergen Stergensen, who left Martin Point, east of Barter River, March 22 last, heading due north in search of new land, will never be heard from again.

Stefansson expected to reach Banks Land, to the eastward, but Captain Bernard says the ice is and has been moving continually to the westward, so that if the adventurous three ever set foot on shore again their first land will be Siberia. The ice movement has been rapid the past Summer.

Captain Bernard, on his voyage from the mouth of the Mackensie River, the mouth of the Mackensie River, passed the three powerboats of the Stefansson fleet, the Alaska, Mary Sachs and North Star, east of Demarcation Point. ## Prophets of Profit

WE believe the lean days are over. We believe prosperity is here-the greatest boom times we have known in a generation

> Every keen-visioned man can see it. The armies of Europe fighting for military power have combined to make America the world's great commercial power. During the fiscal year ending June 30, 1914, the United States imported \$1,892,000,000 worth of goods. A pretty good item for our own manufacturers to supply this year. In addition, our mills must double their exports to make up for the goods Europe cannot supply. The figures are dazzling-the profits stupendous.
