The ground in front of the infantry trenches is also as a rule under cross fire from the field artillery placed on neighboring features and under high-angle fire from pieces placed well back behind the woods on top of the plateau. "A feature of this action, as of the previous fighting, is the use by the enemy of their numerous heavy how-itzers, with which they are able to direct long-range fire all over the valley and right across it. Upon these they evidently place great reliance.

# "OUR FIGHT" FOR THE OREGON LEGISLATURE SECOND LESSON IN PRACTICAL POLITICS

"Onr lesson today, children, is "Our Fight for the Oregon Legislature."

I promised you that this would be a bigger joke than our first

After our big "hurrah meeting" in Pittsburg, the political department of the millionaires called us his appointment of the committee spondent of the Star says the Servian and Montenegrin troops have occupied and Montenegrin troops have occupied and Montenegrin troops have occupied Sarajevo, which was abandoned by the Strandborg, the directors voted to accept the services of the "Mut Wangdoodle Band" that is now in the process of organization.

The following directors will serve at the head of respective committees: The head of respective committees: Military, fraternal and industrial, George L. Baker; athletics and special features, Charles F. Berg; publicity, J. Fred Larson; finance, H. L. Corbett; decorations, Jacob Kanzier; automobile, to us that, through the different BRITISH TAKE PACIFIC ISLE millionaires in the Anti-Saloon League, they could pull strings on cific Coast states. You see they owned a lot of natural resources out here already, or were silent The British flag now flies over the other mineral deposits in these states; the timber resources of these three states were the greatest in the whole country; the power possibilities were immense and

these millionaires wanted them. But, you see, children, they could steal most of these resources by merely stealing the Legislatures. They wouldn't have to pay a cent for them. Isn't that the simplest thing in high financing, children, you ever saw? Willie, I shall send

you home if you don't stop laugh-

But when they handed us our programme, with the three different prohibition issues for the three different Pacific Coast states all nicely typewritten, I could hardly keep my own face straight. But I thought of my new job of fooling the people and that sobered me up. These politicians explained to us

ance, but for votes, because it takes votes to get Legislatures. They told us that they did not expect to get the California and Washington Legislatures this first year, but that Oregon voters possibly might be fooled. The pe of Oregon, they told us, had swallowed about every brand of freak

that we should remember that we

were not working for true temper-

legislation, if enough hysteria and emotion had been put into it. Of course, children, we are forced to admit that if we were working for true temperance in Oregon we would have to prohibit the "manufacture," "sale," "dis-tribution," "use" and "giving away" of alcoholic beverages for "all purposes." But we felt that we could fool enough of the voters of Oregon by only prohibiting the "manufacture" and "sale" of alcoholic beverages to capture the Legislature. So you see we crossed out the words "distribution," "use" and "giving away" in the Oregon issue. As you think this over, children, you will see how this elever little piece of polities may get us enough votes to get the Legislature. We didn't have a ghost of a show of getting the Legislature without doing it. The people don't generally know it, but we already have quite a number of members of the Legislature now in all three states, including Oregon. So, even though we don't carry the prohibition amendment here in Oregon this Fall, if we elect enough "prohi" members to give us a majority, we don't care a whoop whether our

brand of prohibition succeeds or

The politicians told us that they didn't have a chance, within 200, 000 votes, of carrying California, but they wanted to use the issue in that state for campaign purposes in states to the eastward. You see their grip on the Legislatures has been slipping in Colorado, Ohio and Virginia, where they have been doing some rotten work with their workingmen. These are the only other states where they are making a FIGHT FOR TEM-PERANCE this year, and they are trying to save their face in those states by pointing out WHAT WE ARE FIGHTING FOR IN CALI-FORNIA. So in the California issue they left the word "distribution" in. Even at that they figure on capturing some more members in the California Legislature this

We all had a good laugh when the Washington issue was decided on. The politicians explained that the Washington voters wouldn't begin to vote for what the Oregon voters would, so they figured out that they would make the County Auditors the official barkeepers of that state.

So they scratched out everything that would mean true temperance except the word "manufacture" and arranged for the Washington voters, man or woman, that they may ship in a HALF GALLON OF ALCOHOL or a DOZEN BOT-TLES OF BEER EVERY TWEN-TY DAYS by buying a 25-cent permit. You see Washington would continue to get the saloon license money in another way, but in Oregon they decided they could fool the voters so as to take about NINE HUNDRED THOUSAND DOLLARS away from them in license money. The people in Oregon, you see, children, have voted for any freak legislation that came along, if enough hysteria could be put into the issue to fool them. They're beginning to holler, I understand, now that they find that their taxes are going up like a skyrocket, but we hope to have them overlook this side of the issue this

year by fooling them. We laughed and laughed when one politician told us that the people of Washington could stay drunk all the time on the gallon of whisky which each voter could make out of his half gallon of alcohol. That, you know, children, is more than the average individual consumption in the whole United States today. But as long as we are not working for true temperance in these three Pacific Coast states, but only want the Legislatures, we were told that

we should worry. I think it's the funniest thing in practical politics I have ever seen. Don't you, children?
