A Home Recipe for Removing Wrinkles

Who will blame the modern woman for trying to look as young and attractive as she reasonably can? Why should she be placed at a disadvantage should she be placed at a disadvantage in numerous ways by wearing wrinkles, if she can avoid these hateful marks of advancing age? Few women, however, know what to do to effectually rid themselves of wrinkles or sagginess. Most of the advertised preparations are unsatisfactory and very expensive. But a very simple and harmless home remedy, which any woman can make, will work wonders where all the patent preparations fall.

Buy an ounce of powdered saxolite at any drug store. Dissolve the whole ounce in a half pint of witch hazel and use as a wash lotion. The results are practically instantaneous. Marked improvement is noticed immediately after the very first trial. Wrinkles and sagging are corrected and the face feels so refreshed and smug-like.—Adv.
