ware. Reactions set in, however, when the fact began to be apparent that expert business was not developing unusual volume, even when offers were made at a decided concession in price.

Corn made only a temporary dip in response to the setback shown in wheat. Wet weather threatening to delay receipts was partly responsible for the atrength of the market, and so also was a tendency to even up trades in anticipation of the Government crop report. The Washington estimate, which arrived just after the close, proved, however, to be more bearish than had been expected.

Gate reflected in a moderate way the renewal of a liberal demand from the seaboard. It was said that one purchase from France amounted to 400,000 bushels.

Large receipts of hogs at Western centers weakened the provision market. Buying on the part of packers, though, had a steadying effect after the decline.
