Repeated attempts of unneutral acts by both sides caused Colonel Gullfoyle. American commander, to prepare for action. The international boundary was marked today with American flags and protecting outposts were placed where the two armies could be watched.

Sonal Feeling Against Villa.

WASHINGTON, Oct. 7.—Speedy restoration of harmony between Generals Carranza and Villa through open conferences at Auguas Calientes was predicted tonight in a stateemnt issued by the constitutionalist agency here. The statement quotes Richard Cole, of Los Angeles, who it says is a personal friend of Carranza, and continues:

"Carranza has no personal feelings against Villa," said Mr. Cole. "He feels that the General of the division of the North has been led to his present rebellious position by designing and unscrupulous persons who have posed as Villa's friends. I think Villa is a big enough man to admit his mistake when it is once brought home to him. Mexico can use both the services of Carranza and Villa, acting in their proper spheres.

"Carranza is cager to retire to pri-

proper spheres.

"Carranza is cager to retire to private life. He is worn out and only a sense of duty keeps him engaged in directing the constitutional cause. He has promised to visit the United States and make a few menths' tour."

Mr. Cole is here to seek recognition for the Mexican central government. He said he expected to cenfer with

It is alleged that upon their arrival at the hopyard it was found a hoppicking machine had been installed, and the bulk of the hops, it is stated, was gathered by this mechanical device. There remained for handpicking, it is stated, only the smaller clusters of hops, and consequently little money could be made by the pickers.

During the Boer war the French field pieces of the Boers had a much greater range than the standard field pieces used by the British. As a result, the English bought guns from German makers and took 4.7-inch and 5-inch guns from their cruisers and manufactured gun carriages for them so they could be used for field work.
