THE MORNING OREGONIAN, THURSDAY, OCTOBEP 22, 1914.

Report Now Credited That Krupps Are at Work on 60-Centimeter Ordnance.

TRANSPORT IS POSSIBLE

Rumors of Intention to Bombard British Coast Not Believed-Purpose Probably Is to Arm Naval Base on English Channel.

THE HAGUE, October 10,-(Correspondence of the Associated Press.)-To the rumors that the Krupp works at Essen are building 55-centimeter guns nas now been added another-the assertion that the same plant is turning out 60-centimeter slege pieces. While it is hard to believe this, it must be borne in mind that a siege piece of 42 centimeters, the existence of which was doubted before the war, has be-come a convincing reality, as has also the Austrian 30.5-centimeter piece, which, even after the outbreak of the war, was looked upon as the object of an interesting fable. • To be sure, a 30.5-centimeter (about 12-inch) gun was not in itself a nov-eity. That the Austrians would be able to make such a piece mobile for field purposes, however, was thought at Essen are building 55-centimeter

field purposes, however, was thought out of the question. The same process of reasoning was applied to the Ger-man 42-centimeter or 1635-inch gun. A mathematical relation of cause and offert ind to the semelurion that A mathematical relation of cause and effect led to the conclusion that a 16%-inch gun, while possible, could not be transported easily enough to permit its use in the field. Neverthe-less, it was shown that, though the German 42-centimeter gun weighs about 26 tons, transportation difficul-ties had been overcome. ties had been overcome

Existence Belleved Possible.

Existence Helleved Possible. Since the increase in weight of a defection of the increase in weight of a defection of the increase in a 60-centimeter or 23%-inch gun over a 23-incher would be an almost neglible quantity, the existence of such pleces need not be doubted in this respect. If it is possible to move over ordinary roads and across soft fields a 26-ton plece, it is not unreassonable to expect that a gun weighing 35-tons would offer on the transportation problem. The attention need be paid to popular minors making the rounds in Germany that the new pleces are designed to bombard the English coast from the transport of the structure of the source of the sourc

vould consist of arming some naval base on the Channel, which the Ger-mans hope to establish in the course of this war. It is maintained that Calais has been decided on as the best local-ity for such a base. meth 1500

Krupps Employing 46,000 Men. There is an authentic report that in the Krupp establishment more than 45,000 men are busy day and night with turning out war material. It is of some interest to know with

It is of some interest to know with what the French oppose these heavy pieces. According to an article in the Berliner Lokal Anzeiger of September 28, the French use a 27-centimeter mortar-smaller than the Austrian mortar piece-and a 120-millimeter and 160-millimeter flat trajectory gun. In addition, there is a 128-millimeter gun of older pattern. To facilitate com-parison, the Austrian, French and Ger-man equipments are given in a table of millimeters: Calibre

Austian motor-battery piece. German slege mortars and howitzers. French mortar Prench flat trajectory piece, heavy. Prench flat trajectory piece, lighter. Prench fortreas piece, old style.

WAR HEROES OF TODAY-No. 5.

"Monstrous Perversions" Charged. "The monstrous perversions of the foreign war reporting, which not only suppresses the truth when it is uncom-fortable for them but also apreads sys-tematically malicious falsehoods for the purpose of damaging the reputation of Germany, compel Germans in this mat-ter to make an earnest defense. "Especially does the municipal ad-ministration of our city regard it as its patriotic duty to take official steps to make continuously accessible to the Washington State Aggregation at Pull-

Its patriotic duty to take official steps to make continuously accessible to the authorities and the citizens of great municipalities of neutral states the re-ports of the German press of the prof-ress of the war. "The German newspapers publish regularly the dispatches from the Ger-man headquarters upon the state of affairs. This information, which comes plain and unadorned from uncontam-

make their exit from Corvallis tomor-row for Pullman, where the Washing-ton State eleven will be met Saturday. The number of cripples who have been out of scrimmage this week, the affairs. This information, which comes plain and unadorned from uncontam-inated sources, will give to the world constantly a trustworthy and clear view of events. A comparison of these reports with those in the press of our adversaries will show hereafter on which side the truth was to be found and on which side lies and hypocrisy have made their home. The number of cripples who have been out of scrimmage this week, the slovenly manner in which practice has proceeded, the genuine apprehension of the coaches and a deep realization, born of sad experience, that there is much truth in the Scriptural statement that "pride goeth before a fall," com-bine to keep the Aggie fans far from sanguine. Captain Gus Hofer, whose work at full and tackle Saturday was of a high order, has been laid up with a "Charlie horse" of exceptional severity. He will make the trip to Pullman, though he will be out of condition as the result of his layoff. "Andy" Anderson is an-other hospital patient, the victim of a peculiar malady. In Saturady's game on the water-soaked local field Ander-son became involved in some lime used to denote a boundary, said corrosive calciam compound finding its way be-neath the veteran's jersey. As a re-sult Anderson is nursing a burn on his bac kas large as a porous plaster. It is doubtful if he will be taken to

"We enclose herewith some of the war dispatches of Wolff's Telegraphic Bureau for the month of August. We shall send you daily newspapers reg-ularly." We enclose herewith some of the war dispatches of Wolff's Telegraphic Bureau for the month of August. We shall send you daily newspapers regularly."
CHINESE TOWNS RUINED Loss of Life Is Large and Thousands Are Near Famine.
WASHINGTON, Oct. 21.—Entire Chinese villages were swept away in the tempest which interfered with the early operations of the Japanese against the German fortifications at Kiau-Chau, it was made known today in the report to the State Department from the American Vice-Consul at the device of the location of the transition of the state Department from the American Vice-Consul at the device of the location of the transition of the state Department from the American Vice-Consul at the device of the location of the transition of the state Department from the American Vice-Consul at the device of the location of the the discussed and a vote taken.

Tideland or Waterfront Bills 328-329 and 330-331

Of all the people in the state, there are not many of us who own any of the so-called tidelands, so we are apt to think we are not much interested in these bills (328-329 and 330-331), which are supposed to give back to the state the water frontage or tidelands. But think-this property is now paying taxes at a high assessed value. If these bills carry it will reduce the value of such prop-

20 Million Dollars

That means Twenty Million Dollars' worth of property now paying taxes will no longer pay any taxes. But, as it costs just as much to run the government as it ever did, the rest of us have to make up the difference. And what do we get for it ! Law suits, running for many years, which absolutely kill all waterfront development, and if we win in the end all we get is title to some mud land below low water line-not wide enough in any place to build docks on and absolutely worthless to anybody except the owner of the shoreland.

All the advocates of these bills claim is that when the city wishes to build public docks and has to condemn the shoreland back of the low water line, the city can get this land cheaper than it can now. We are not going to build many public docks, for we have no use for them, and yet in order to save a few thousand dollars for the three or four docks we want to build, we are going to cut down the assessed value of all this waterfront land. Do you call that good business?

Why Are Ten Tons of Quinine **Used Every Year?**

This enormous quantity of Quinine alone (representing about 1-30th of all the Quinine produced in the world) is required for the preparation of Laxative Bromo Quinine, Seven Million (7,000,000) Boxes of which are used every year because of its extraordinary merit.

After reading the accompanying label from the box of Laxative Bromo An excellent remedy for Coughs and Colds. Relieves the Cough and also the feverish conditions and Headache, which are usually associated with colds. The second or third dose will relieve the Cough and Headache and will more the bowels well within 8 or 10 hours, when the cold will be relieved. In treating colds it is very important that the bowels should move well every day. This preparation moves the howels gently without griping, and arouses the liver and all the secretions to action. Directions: - Adults wo tablets is the user dose and should be taken imme-iately after ich medicate the going to bed. Some per-sons, who childed on the secretion of the cough and Cold is relieved, then take one-half the dose for a few days. Children who are not old enough to swallow pills, the tablet can be broken or cut in half and given in proportion to age. To be swallowed not chewed. For headache, take tablets every 2 or 3 hours until relieved. Quinine, telling what it does and how it does it, you can understand why this remedy is used so effectively by so many millions of people. Whenever you feel a cold coming on think of the name Laxative (Fac-simile of label on back of Lazative Bromo Quinine boz) Bromo Quinine.

PETROGRAD, via London. Oct. 21.— Refugees from Russian Poland have brought information concerning a se-cret telephone system of which the Germans have made extended use. They relate that when German troops enter a town in Russian Poland some officer at once asks to be directed to the home of a non-Pollsh resident, giv-ing the man's name. In the house in-variably there is found a telephone, and the cellar is stocked with benzine or passing canned soups and other pro-visions. 64.

VENICE, Oct. 21, via Paris.—Short-age of raw materials, notably cotton, wool, jute and petroleum, is greatly restricting production in many branches of manufacture in Austria-Hungary, according to advices received here. It is officially estimated that the supplies of some of the most necessary raw products are barely sufficient for the next two months. Factories are closing and the number of unemployed is increasing steadily.
 This applies, not only to the chief manufacturing districts of Morovia and Bohemia, but to many other points, such as Trieste, where the unemployed integration are several thousand.
