THE BEST INDEX

of what the coffee trade think of the harmfulness of the coffee-drug, caffeine, is shown in their efforts to get rid of it—to get a coffee that doesn't contain caffeine!

When they do succeed in getting rid of some of the caffeine drug-content, the result is a weak, "clover-tea" decoction that few appreciate.

But after all their efforts to rid coffee of part of its caffeine, how about the other coffee-drug, "tannin"—about 2 2-5 grains to every cup of coffee!

Tannin is the drug used to tan hides with.

Do you know what it does to your stomach? Probably not. Here is what good authorities say about it:—

"Tannic acid in coffee interferes with digestion."

"The caffeine and theine in coffee and tea are cerebral stimulants, and the tannic acid is an astringent, affecting especially the muscular fibers of the intestinal walls."

"Tannic acid is universally condemned by all authorities as a hindrance to digestion and health."

Why keep on running the risk of serious interference with health? Why not quit a table beverage that bears in its train a lot of trouble like nervousness, headache, heart, stomach, bowel disturbance, insomnia, etc.?

Thousands, suffering from these ills, find it easy to quit coffee when they have at hand the delicious, nourishing beverage—
