Broader Inquiry for Investment Securities Results From Recent Elections - Liverpool Cotton Exchange to Reopen Today.

Stock exchange authorities denied reports that the representatives of the British government, now conferring with American Treasury officials and bankers, had suggested the advisability of an indefinite suspension of regular market operations here. Improvement in sentiment was most pronounced in the steel trade, despite the benounced in the steel trade, another large describes in unfilled orders.

Manufacturers in other lines, including textiles, also expressed a more hopeful view of the immediate future.

Another advance in rates on Parls was the leature of the foreign stock exchange, both bills and checks rising materially as a result of the reduced supply of bills. The London market was a shade easier. Exchange on Montreal rose again, the most plausible explanation in that connection being found in the heavy purchases made here by Canada for the account of, the British government.

Alaska Miner Says Broad Pass Isn't Place for Poor Mau.

CLACKAMAS, Or., Nov. 5.—(Special.)

The rich gold strike at Broad Pass, on the line of the survey of the proposed Government railroad from Seward to Fairbanks, led C. C. Grimes, of Milweukle, Or., a miner of 20 years experience in Alaska, to give out the following information, hoping to prevent men unfamiliar with the district frou making an unnecessary trip.

"Broad Pass, said Mr. Grimes," is the mest talked-of place in Alaska at present, owing to the richness, of its claims; but it is not a poor man's country, being a base, instead of placer district, which were offered and the market was strong on the street, ordinary of the proposed district, which were offered and the market program of the street of placer district, which were offered and the market was strong on the street, ordinary of the proposed country, being a base, instead of placer district, which were offered and the market was strong on the street, ordinary of the proposed country, being a base, instead of placer district, which were offered and the market for Thanksgiving week. No prospector should

be fooled.

"Broad Pass is about 300 miles from Seward. In Summer it may be reached via Cook's Inlet and the Shusitna River and an overland trip of 150 miles. In Winter, the best time to go to the diggings, it is reached by dog teams. Five dogs, costing \$50 each, can pull 750 pounds 10 miles a day. Fifteen hundred pounds of supplies will last a man all Winter. This necessitates relaying the supplies.

supplies.
"Broad Pass has two ledges, from 1290 to 250 feet in width, and several miles long. Two brothers named Wells have known of this strike for seven years, living on it all that time, supporting themselves by trapping and selling out for \$150,000. The entire ledge is ore worth about \$15 a ton, but Wells Bros had a streak 14 feet wife. Wells Bros. had a streak 14 feet wide, which ran \$250 a ton. "The ore cannot be used until the

railroad brings machinery with which to smelt it. To stake out a claim would mean nothing. Big corporations, such as the Guggenheims, buy only tracts, or groups, of claims, and the returns from this section obviously will not be available for a long time.

"Nevertheless, I predict that from 300, to 500 persons will go to Broad Pass from Alaska Coast cities in February. Knik is the place where assessed." Knik is the place where assays are made and provisions may be obtained there at prices about the same as in Scattle."

WHEAT EASIER AT CHICAGO

Eighths to Cent Lower. Big Primary Receipts.

CHICAGO, Nov. 5.—Lively profit taking, due to the fact that prices had risen to a higher level than at any time since early in September, brought about a decided downward swing today in wheat. The market closed heavy, % to ic under last night, Corn suffered a net loss of % to %c and cats of % to %6 %. Provisions wound up unchanged to 30c higher.

Holders of wheat were prompt to take advantage of a new upturn today in prices. The finish was at the low point of the session. European demand, which at first appeared to follow the market during the early advance, showed a noticeable contraction here later on, possibly owing to reported difficulty in obtaining ready freight room on the Atlantic. Big receipts of wheat at primary points, especially Chicago, had a good deal to do with making conservative desires hesitate about pressing the buil side of the market.
