Bobby opened his mouth to ask a question, but then he remembered what Drusilla said about interrupting her, and he closed his lips and listened.

"After we had seen so many dreadful creatures that I was frightened about out of my wits," continued Drusilla, "that nurse said, 'We must see the elephant,' and I most know that she went in there on purpose to have the dreadful thing happen to me.

"She had a bag of peanuts, and she gave that awful creature some to eat, and he reached out the longest tall, which was right on his face. You know, I saw one once at a circus—an elephant, I mean—but I did not know they could pick up anything with that tall.

Hair dye is not a natural color restorative. It simply stains the hair by chemical action, and leaves a lustreless finish that tells what you are using.

The simple, clean and healthful method is by using Hay's Hair Health, which contains a certain element that so prepares the hair that the air causes it to come back to its natural color.

It can't harm. It singles out every faded strand and restores it—makes it full color, healthy, lustrous. No other result can be produced.

If you want these benefits in your case begin at once the use of the natural method—Hay's Hair Health. Not a dye. No one will know you are using it. Any one who purchases a bottle from any druggist who selis it in this town, does so with a full understanding that the price is to be returned if the preparation does not please and satisfy. Judging from the fine results reported among people in Portland, it would seem that in Hay's Hair Health the secret of eternal youth for the hair has been found. Since the war with Russia Japaness women have been forced into commercial life. Japan is a country with cities of large population. In Tokyo alone there are 50,000 business women, 50,000 girls in factories, 15,000 women students. The Y. W. C. A. provides hostels for the students and has be gun working in neighborhood centers, at the stations and among factory girls.

Osaka, Kyoto, Sundai and Yokohiama each with over 1,000,000 inhabitants, have been calling for Y. W. C. A. secretaries for four years. Yokohama business girls have started a little branch with rest and clubrooms, and work at the railway station has been opened.

The country of Japan recognizes the social needs only of the married woman in her home. The fact that some women are slumbering was brought home the other day by a woman caller. She was the merest acquaintance, but she said quite frankly that she had nothing to do, nowhere to go, was lonesome and thought she would come and "sit a while with us." She simply came to escape being bored by herself. Probably having had a plentiful supply of that kind of boredom, she preferred being bored by somebody else. A new brand of boredom evidently would be a welcome change.
