## THE SANDMAN STORY FOR TONIGHT BY MRS. F. A. WALKER.

**"U** M-M-M," said Billy Goat one morning as he came in front of Billy Pig's house. "Billy Pig's mother must be cooking something awful good. The air is all spicy."

"Your mother is cooking cake, isn't she?" he asked, as Billy Pig came around the corner of the house, his face smeared with chocolate and sugar. "Yes, she is making cake and cookies and pies, and pudding, and—"

"Billy Goat, 'Don't I just love them! Wouldn't she give you just one little cookie if you asked her real nice?'"

"No, sir; she only let me scrape out the dish she mixed in, and she said I could not have a thing until tomorrow night, when the company comes," Billy Pig replied.

"Billy Pig, we have just got to have some of those good things that your mother is cooking," said Billy Goat, and if you will listen to me I think it can be managed."

"If you think I am going to get a whipping to let you eat cake and cookies and pies and—"

"Oh, no, I don't care anything about it myself," replied Billy Goat. "I only thought of you and how much you liked sweet things. I wouldn't get you into trouble for the world full of sweet things. I guess we better not do it, anyway."

"Oh, yes, do tell me," begged Billy Pig. "I will do it even if there is a little bit of danger for me. What is your plan, Billy Goat? There's frosting on all the cakes, too, and cream puffs that I forgot to tell you about."

"Well, if you really want to know," said Billy Goat, "I will tell you."

"You must complain of not feeling well and keep growing worse until your mother puts you in bed and then, of course, she will run for the doctor, and that is where the dangerous part comes in for me."

"I will get old Doctor Dog's coat and hat and spectacles, and his bag of medicine; he will be asleep about this time, and I can let them without his knowing about it."

"What are you going to do with them?" asked Billy Pig.

"Wait, and I will tell you," said Billy Goat. "I will put on the coat and hat and the spectacles that will disguise me so your mother will not know me."

"Just as she is coming out of the house to go for the doctor I will be passing. Of course, she will think I am the doctor and call me in."

"That is all you need to know, and all you have to do is to be sick and I will do the rest."

"All right, if that's all I have to do," said Billy Pig. "I am sure she will not punish me for being sick and I will do it, but I don't see how I can eat all the sweet things she is making. She never lets me eat when I am sick!"

"Don't worry about that," said Billy Goat. "I will give you all you can eat," said Billy Goat. "I will promise you that."

Billy Pig felt reassured and trotted

## RASH SPREAD OVER HANDS AND FACE

In Great Pain. Itched Terribly. Caused Disfigurement. Unable to Do Work. Used Cuticura Soap and Ointment. Not a Scar Left.

Pennington, Cal.—"A few months ago I was poisoned. It came on my hands first in a rash and in two days it had spread all over my hands and face. It gradually got worse day by day and I was in great pain. My hands and face were a mass of running sores and itched something terrible. I did not dare to scratch as it pained me so. I could not sleep at night. The eruption caused disfigurement. I was unable to do my work at all. It pained me so."

"I tried medicine but it did not help me. I had been about four weeks since I got poisoned, when a friend asked me why I didn't try Cuticura Soap and Ointment. I sent for some right away and began using them following directions. Inside of two days I could see a great change and in seven days after I began to use the Cuticura Soap and Ointment there was not a scar left."

into the house, while Billy Goat scampered off up the road as fast as he could run.

In a few minutes Billy Goat came slowly down the road dressed in Doctor Dog's coat, hat and spectacles and carrying the medicine bag.

Just as he came in front of Billy Pig's house Billy Pig's mother rushed out of the door and almost bumped into Billy Goat.

"Oh! doctor, doctor; come quickly and see Billy Pig; I am afraid he is dying," she said when she saw Billy Goat.

"How lucky I was passing," said the sly Billy Goat as he went into the house.

Later I will tell you what happened.

## Winter Care Of The Garden

**C**are of Geraniums in Winter. The ordinary method of carrying geraniums over the winter as used by florists is as follows:

A few vigorous young plants are taken into a conservatory or greenhouse and cuttings are taken from these during the winter from which a new supply of plants is grown for Spring use. The cuttings for the Spring supply should not be made later than January. If good, stocky plants are desired for the next Summer's use.

The ordinary householder who desires to keep his or her plants through the winter is not usually the possessor of a conservatory where he can follow the method outlined above, and any other method, only disappointing, as the plants will look bad so long in the Spring, and the flowers are never as nice as those from new, young plants.

The following suggestions may help him to keep a part of his geraniums, at least, throughout the winter season: Before the frost has killed the plants, dig up the geraniums and place them in a cool, damp cellar. This cellar should be cooler than that in which bulbs are kept, ranging in temperature from 40 to 60 degrees. In other words, such a cellar as is suitable for storing potatoes. The plants may be placed in deep boxes, standing up and packed close together with a little dry soil about the roots. Geraniums are also sometimes hung up by the roots on the wall or from the joists. In Spring the tops of these plants should be cut off with in two or three inches of the ground and the roots again planted. A loss of half the plants is to be anticipated in following this procedure.

## FATE OF BRIDGE LEASE UP

City May Decide Today Whether It Needs Railroad Span.

Whether or not the city will renew its lease on the Steel bridge, owned by the O. W. R. & N. Company, will be decided at a conference this afternoon at the City Hall between officials of the company and members of the City mission. As the proposition stands the city has offered \$18,000 a year rental, while the company demands \$52,000 a year.

An agreement as to price seems unlikely. In this event the bridge either will be standing up or will be used as a toll bridge.

## "THE FIRST PRETTY CLOTHES CLEO EVER WORE"

"Are the ones she bought at CHERRY'S. She used her CREDIT to get them—and that's the secret!"

"Cleo looked so charming when she appeared in her new suit that it set us all to wondering. And when she came to see me yesterday all dressed up in a new short coat and a perfectly beautiful dress, I asked her right out how it happened."

"Cleo laughed at my amazement when she told me how her coat was a special value at \$12.95, and her dress was reduced a whole third. She simply said she had learned the ECONOMY OF SYSTEM when clothes are to be paid for. A few dollars every week are keeping her attire in the loveliest of 'fashionables'."

"And CHERRY'S SELL THE NEWEST STYLES SO CHEAP THAT IT'S NO extravagance to wear the latest thing out!" Cleo told me CHERRY'S address. I'm going there tomorrow morning. It is 359-391 Washington street, in the Pittcock Block."—Adv.

## Does Your Hair Show Your Age?

Of course white hair and gray always suggest age, but often faded, dull and brittle locks make us think even young people are old, while a lustrous, heavy head of hair is naturally associated with youthfulness and forces us to credit its owner with being young. Perfectly healthy hair is always beautifying and is given to the hair and scalp. In washing the hair it is not advisable to use a moccit, but always use a preparation made for shampooing only. You can enjoy the best that is known about the scalp with uniform color. Dandruff, excess oil and dirt are dissolved and entirely disappear. Your hair will be so fluffy that it will look much heavier than it is. Its luster and softness will also delight you, while the stimulated scalp gains the health which insures hair growth.—Adv't.

In Minnesota the need for trained teachers of agriculture and domestic sciences is so great that the school of agricultural technology at the state university has taken for its main work the preparation of teachers for these subjects.
