DALY HITS SYSTEM

Efficiency Plan Is Failure, Is Argument for Repeal.

ORDINANCE DUE IN COUNCIL

Move to Discard Present Rating Rule That "Won't Work Out" Expected to Meet With Approval of Majority of Members.

Declaring that the so-called effiiency system which has been in use in the city service for more than a year complete failure, City Commissioner Daly yesterday asked City Attorney LaRoche to prepare an ordi-nance repealing the ordinance which was passed a year ago providing for the system. Mr. Daly favors casting the whole affair into the waste basket sh as a dismal failure. His move, it is expected, will meet with the approval of the majority of the members of the

The efficiency system was brought here by an organization known as the New York Bureau of Municipal Research. The bureau was brought here on a contract by a local organization on a contract by a local organization and under a \$4000 contract with the city prepared the efficiency system and several other systems for the regulation of the city service and the city government. The efficiency system was the only part of the work of the research bureau that was adonted by the Council, although the \$4000 promised in the contract was paid.

Under the provisions of the efficiency system employes were to get demarits for various offenses, such as inefficiency, inaccuracies, tardiness, lack of ability and for various other reasons. Provision also was made for merit marks for exceptional service

reasons. Provision also was made for merit marks for exceptional services and for bravery. On the basis of the efficiency reports promotions in service were to be made and increases in salary granted. The increases were to be made at the end of six months.

When the system was put into working order no two departments used it the same. Most of the departments ignored it entirely. Others used it on some occasions. Only one department, that under Commissioner Dieck, applied it vigorously. He carried out the letter and the spirit of the affair with the result that the system caused all kinds of trouble among employes.

Inasmuch as the system costs considerable for operation each month and

kinds of trouble among employes.
Inasmuch as the system costs considerable for operation each menth and entails much work for employes, Commissioner Daly says he believes it is time to get rid of it. "It is a dismal failure." said Commissioner Daly yeaterday. "I have seen this for a long time, but I have withheld action in the hope that it might work out. But it won't work out. The system is wrong and it cannot be made to work rightly."

It is expected that the abolition of the system will be an issue before the Council next week. City Attorney LaRoche says he will get the repealing ordinance ready as soon as possible.

NEW YORK. Feb. 2. — Stocks were consistently strong for the better part of today's session on the exchange, regardless of another spectacular rise in wheat and adverse weather conditions, which were partly responsible for the relatively light dealings. Best prices were registered in the later operations, but recessions were general toward the end when it became known that the British government had ecclared its intention to regard all foodstuffs shipped to its enemies as contraband.

There was some early selling of Canadian Pheific and other international shares, which seemed to proceed from London, where our securities again manifested an uncertain tone. Latest developments in the war were reflected in the uncertain stituted of the British and Prench markets. Selling of gill-edged securities was a feature at both centers, with little effect, however, on our markets for foreign exchange.
