David Robinson Begins Work in Municipal Court.

ORDINANCE NOW IN EFFECT

Oregon Native, Prominent in Labo Circles, Secs Big Field in Championing Needy Who Cannot Employ Attorney.

David Robinson, of 934 East Main street, will be Portland's first public defender in the Municipal Court. The City Council at an executive session yesterday decided upon him as the most suitable man for the position out of 34 attorneys who applied. He will take up the work today. The position carries a salary of \$150 a month. Mr. Robinson is a native of Port-land. He was born in November, 1889. He graduated from the University of Oregon law school and was admitted to practice in June, 1913. Since then he

Wheat Slumps Following Break at Chicago.

PEACE RUMORS ARE CAUSE

Local Values Are Off 4 to 8 Cents. May Bluestem Sells 33 Cents Under High Point Reached in February.

The pendulum swung the other way in the wheat market yeaterday. When the local traders assembled at the Merchants Exchange at noon one giance at the Chicago blackboard was enough to take all the enthusiasm out of them. The optimism of the preceding day gave way to a feeling of another kind. The wild fluctuations at Chicago, leading to a 7½-cent break and finally at the close to a net loss of 4 is cents, were reflected in the local market by a material scaling down of bid and asked prices. Only a few sales were put through, but they registered declines of 3 to 8 and 5 cents.

The possibility of early peace was who broke the Chicago market. Reports of the cancellation of orders for several million dollars' worth of arms and ammunition in this country were believed to point to a definite move to end the conflict. These re-ports and the rumors that Austria, as well as Turkey, was preparing to sue for peace, made the wheat speculator's position here as well as in the East a precarious one Exporters and other buyers naturally held

wool values hardened so pe eptibly despite the fact that the demand was a good deal smaller than last week of the week previous that dealers were convinced that prices were going to remain very high for some time to come, says the New York Journal of Commerce. Fine wools moved up in a way that placed quotations very close to the highest figures procured late in 1900, when fine medium territory scoured sold at 74c a pound and 12 months Fexas fetched 76c a pound scoured, Reports from Boston stated that the sup-

ply of half-blood, three-eighths blood and quarter-blood domestic wools in dealers' hands was the smallest ever known at this time of the year. On the New York market the stock held by one dealer was very large compared with the quantities reported from

the leading domestic market,
Dealers were rejuctant to send represen tatives West to negotiate for new clips, beeagerness would only result in increasing he ideas of values held by the growers That this attitude had not been taken by all was shown by the reports that came from sections where shearing is either in progress or not far distant. One Boston ouse was reported to have contracted for 1,000,000 pounds of Utah wool to be delivered next June at 25c a pound. It is estinated that the laid-down cost in Boston will be 27c, or 67 1/2 a pound scoured.

Chicago Options Tumble 7 1-2 Cents and Close Is Wild at Net Loss of 41-4 to 17-8 Cents-Oats Suffer in Sympathy.

CHICAGO, March 4.—Sensational reports that millions of dollars in orders for war materials from the United States had been cancelled in the last 48 hours nearly knocked the bottom roday out of the wheat market. After a fall of 74c a bushel, prices closed wild at 42c to 45c under has night. Cern suffered a net decline of 14 ge 15c and oats of 14c. Provisions made a ragged finish, ranging from 10c off to a rise of 5c. Stampede Seiling so urgent that prices snapped 1 cent to 3 cents between trades hardly a moment apart took place in the wheat pit as soon as even a hint was caught of the possibility of an early peace. Before the wheat market had gone to pieces on the conclusion jumped at that the supposed cancelling of orders for war material might mean some important move to end hostilities, the course of trading was nervous and irregular, but within ordinary limits.

Corn suffered in sympathy with the break in wheat. The buil side was also helped by large stocks and the slowness of shipping call.

Oats displayed independent strength early, but finally tumbled like other cereals. The

PROTEST AGAINST VICTIM BY BRIT. ISH GOVERNMENT.

Shipment of Northwestern Fruit in Danger of Destruction by Delay at Dover.

SEATTLE, Wash., March 4.—Pretesting against the action of the British governmen in stopping American vessels loaded with perishable products an route from the United States to neutral nations, a number of Senators and Congressmen have called the attention of the State Department to concrete lustance.

the attention of the State Department to a concrete instance.

A large shipment of apples from the Northwest representing several co-operative growers' associations, to Stockholm, Sweden, was recently exported in the eteament Dochra, an American bottom. The vessel was shopped by order of the British government and held eight days at Dover, England, to learn whether any part thereof was contraband, destined for Germany. Being highly perishable and not shipped under refrigeration there was great danger of the fruit spoiling.

In order to avoid such difficulties and unpleasantness it is urged that in the future the British government make such inspections on this side, while the fruit is being loaded; then if desired, send an official of POHTLAND & COOS BAY S. S. LINE

Its own aboard the ship to see that no transfer be made on sea to the boat of a linestic nation. This would avail delay to the commerce of neutral countries.

Apple shippers of the Northwest have telegraphed a protest to the internate Commerce Commission, requesting suspension of a rule just promulasted by the railway companies. This rule prescribes shipments of perishable freight will not be hundled under tentilation during the perish October 15 to the following April 15 in clusive. The protest states this rule to be unreasonable and unjust.

The object of the railreads in making the new ruling is obviously to reduce their liability for damage claims and to reduce their liability for damage claims and to reduce themselves of considerable exponse in pretecting fruit in transit. If the new rule becomes effective, shipments made in cold weather must be equipped for heater service at the exponse of the shipper. Shippers of assume all responsibility of presection grains heat and frost on his own account.
