Crookes Glass Lenses

The Invention of Sir William Crookes of London

For Tired, Burning Light Affected Eyes

READ THIS ARTICLE

A large percentage of light is of no value in the production of vision. Outside the limits of the visible spectrum lie infra red rays at one end, the ultra-violet rays at the other—one tends to produce cataract and the other fluorescence in the eye.

Crookes lenses are in two tints and so colorless as to appear like white glass and they achieve better results than unsightly colored glasses. Crookes lenses absorb heat and ultra violet rays without altering any of the natural colors.

For those whose eyes are affected by light and heat these are the only safe lenses, and for the motorist, the sportsman and those whose duty takes them out of doors in the glare of the sun and its heat Crookes glasses offer eye relief and comfort. Come in and let us explain these new lenses.

MIX THE BREAKFAST BISCUITS the Night Before—

Set Them Away in a Cool Place and Bake them Fresh in the Morning

If the family do not all eat breakfast together, you can bake a few at a time. If you are having hot biscuits for supper, mix and cut out enough more for breakfast. They will be much nicer freshly baked than warmed over.

Of course you can't do this very successfully with sour milk and soda or with any of the old fashioned, single acting baking powders, but this convenient way of making hot biscuits and muffins for breakfast is entirely satisfactory if you use

KG BAKING POWDER

which is really a blend of two baking powders, one of which begins to give off leavening gas as soon as moisture is added. The other is inactive until heat is applied. The dough will remain in a partly leavened condition for hours and when put in the oven will come up just as light and fluffy as if freshly mixed.

Get a can of K C today and try this easy way of baking biscuits at once. You'll never go back to the old way.

Girls With Beautiful Faces or Graceful Figures.

American girls have a world-wide reputation for beauty, but, at the same time, there are girls in our cities who possess neither beauty of face nor form, because in these instances they suffer from nervousness, the result of disorders of the womanly organism. At regular intervals they suffer so much that their strength leaves them; they are so prostrated that it takes days for them to recover their strength. Of course, such periodic distress has its bad effect on the nervous system. The withered and drawn faces, the dark circles and crow's feet about the eyes, the straight figure without those curves which lend so much to feminine beauty are the unmistakable signs of womanly disorders.

When a girl becomes a woman, when a woman becomes a mother, when a man passes through the changes of middle life, are the three periods of life when health and strength are most needed to withstand the pain and distress often caused by severe organic disturbances.

At these critical times women are best fortified by the use of Dr. Pierce's Favorite Prescription, an old remedy of proved worth that keeps the entire female system perfectly regulated and in excellent condition.

Mothers, if your daughters are weak, lack ambition, are troubled with headaches, lassitude and are pale and sickly, Dr. Pierce's Favorite Prescription is just what they need to surely bring the bloom of health to their cheeks and make them strong and healthy.

If you are a sufferer, if your daughter, mother, sister need help get Dr. Pierce's Favorite Prescription in liquid or tablet form. Then address Dr. Pierce, Invalids' Hotel, Buffalo, N. Y., and receive confidential advice from a 16-page book on women's diseases sent free—Adv.
