HONOLULU, T. H., March 26,-United States submarine F-4 lay on the ocean floor disabled late tonight, while 300 feet above her a score of vessels combined in a strenuous effort to bring her to the surface.

When the cables of the naval tug Navajo first made fast to the heavy mass which afterward proved to be F-4 it was thought possible to tow her to shoal water, where it would be an easy matter to raise her.

# Towing Plan Abandoned.

Shortly before 5 P. M., however, this plan was discarded, owing to the slowness of towing operations. An aerogram was sent to the naval Sir Edward Grey. Vessels in the vicinity which are equipped with submarine signal apparatus still continue to send out signals, but no answer has come. .

Location of the F-4 was preceded by a day of incessant searching. When the grappling boats at first failed to find her, all possible theories were credited and acted on. At one time a report reached navy officials that the F-4 had been located 210 feet To Drive Jitney Between Car and below the surface at the entrance to the harbor. New cable tenders were dispatched to the spot and launches circled the harbor continuously, dragging chains on cables.
