ANTI-KAMNIA TABLETS FOR Locomotor Ataxia

In a very interesting article on Locomotor Ataxia, Dr. Henry C. Story says that drugs bave practically no beneficial effect in these cases. He says that rest should be insisted upon, and there should be no worries or troubles. Plenty of fresh air and moderate exercise must be insisted upon, but over-exertion is injurious. The use of tobacco and alcohol should be strictly forbidden, and over-eating is dangerous, especially when the food is noorly masticated. The food must be of the most nourishing kind, and the quantity and variety must be changed so that the patient will not lose his appointe. The most annoying symptom in these cases is the pain which at times is almost unbearable. Dr. Story says that he finds two Anti-kamina Tablets repeated has hour if necessary, gives prompt relief and rust to the patient.
