Is Coffee After Your Job? The average cup of coffee contains about 2 1/2 grains of caffeine, a poisonous drug that handicaps the efficiency and chances for promotion of many bright men and women. Read This Letter: "Down at the Junction," writes a railroad man, "where I am employed as Telegraph Operator and Towerman for a busy railroad, where every second counts and where I hold the lives of the entire train crew and passengers in my hand, I found coffee was making me dull and exceedingly nervous. "My wife told me about Postum. I tried it and liked it. I never drink anything else now. I have a tin of Instant Postum in my mail. I feel fine, my brain is quick and active and there's no delay at the Junction while I'm on duty. I really think coffee would have put me out of a job if I hadn't quit it for Postum." If coffee is crimping your prospects, try a change to POSTUM. Made only of selected wheat and a small per cent of wholesome molasses, Postum contains nothing harmful or injurious, but is, on the contrary, healthful and invigorating. Postum comes in two forms: Postum Cereal—the original form—must be well boiled, 15c and 25c packages; Instant Postum—the soluble form—made instantly in the cup with hot water, 30c and 50c tins. Both kinds are equally delicious, and cost per cup about the same. "There's a Reason" for POSTUM—sold by Grocers everywhere.
