

CHEAP PAVING

County Asked to Do Own Work at 60 Cents a Yard.

THIRD SAVING BONUS ASKED

R. S. Dulin, Municipal Bureau Chief, and R. G. McMullen, Engineer's Aide, Give Data to Show Actual Cost of Material for Types.

Convinced by extensive experiments and experience in handling the construction of pavement in Portland the Multnomah County road paving, as proposed under the recently authorized \$1,250,000 bond issue, can be done for 60 cents a yard or less, R. S. Dulin, chief of the Municipal Bureau of Standards, and R. G. McMullen, assistant engineer in the Municipal Department of Public Works yesterday submitted a proposition to the Board of County Commissioners, in which they ask the county to do the paving itself instead of contracting it.

The two officials offer to take charge of the work at a salary of \$300 a month, to provide for the supervision in laying the pavement for less than 60 cents a yard of the amount saved by laying the concrete in a paving plant at Kelly Butte and to have the county do all the work of mixing and laying the pavement. The paving plant is estimated to cost \$100,000, which is included in the \$493,520 which the officials fix as the cost of the entire 70 miles of paving.

Our statistics under no circumstances can be construed in the nature of experiments, reads the communication, but are based upon knowledge accumulated over a long term of years while supervising the laying of 80 per cent of Portland's pavements.

The American Society of Civil Engineers, in a standard opinion on this type of pavement, divided them into three types, according to the various sizes of the aggregate used. The first type is a concrete pavement, the second is a concrete pavement with various trade names come within the limits of the three types.

The following tables show the actual cost of the materials in types "A" and "C" of the American Society of Civil Engineers classification of a square yard of finished pavement, as well as the estimated labor cost of the various types of paving, including spreading, rolling and placing of the grit finish on the surface of the pavement. The data are for Multnomah County on January 1, 1915.

Total for Square Yard at 57c. Type "B", bituminous concrete pavement, two-inch-thick combination of sand or crushed asphaltic cement, screenings, sand, filler and bituminous cement—

Cost a Square Yard. Stone screenings, rock dust filler at \$1 a cubic yard, \$1.00. Sand, crushed, 1/2 inch, \$1.00. Bitumen, 8.5 per cent, at \$10.00 a ton 10.00. Total cost of materials, \$2.154. Total labor cost for spreading, shaping, mixing, hauling, spreading, rolling and placing of the grit finish, \$1.574. Total cost of a square yard of finished pavement, \$3.728. Type "C", bituminous concrete pavement, two inches thick, composed of broken stone, sand, filler and bitumen—

Stone, rock dust filler, at \$1 a cubic yard, \$1.00. Sand, crushed, 1/2 inch, \$1.00. Bitumen, 8.5 per cent, at \$10.00 a ton 10.00. Total cost of materials, \$2.259. Total labor cost for spreading, shaping, mixing, hauling, spreading, rolling and grit finish, \$1.503. Total cost of a square yard of finished pavement, \$3.762. The price allowances made throughout these cost estimates are liberal.

"We know that this cost of 60 cents a yard or less can be attained with labor receiving the maximum amount of pay. The price of asphaltic cement is \$10.50 a ton in Portland, while Eastern cities have to pay \$27 a ton or more. Rock can be obtained here for less than \$1 a cubic yard, while in Eastern cities it has to pay more than \$2 a yard."

PLAN AGAINST SMUT GIVEN Cutting Wheat in Stiff Dough and "Curing" in Shock Advised.

CLARKSTON, Wash., April 21.—(Special.)—Cutting wheat in the stiff dough and allowing it to ripen, or "cure" in the shock before threshing is out of the question, according to an experiment station report from the state of Washington, as a probable means of lessening the prevalence of smut or dust explosions of separators during the summer harvest.

It is pointed out further that by cutting the wheat in the stiff dough and allowing it to ripen or cure in the shock, as it will do without injury to the grain, the cereal berry remains somewhat tough and is not crushed so badly and powdered in the operation of threshing, which lessens the amount of floating organic dust in the separator, that to extent reducing the chance of dust explosion. Throughout the state of Washington, weather indications and the moisture now stored in the soil from last winter's precipitation point to a dry harvest season.

THREE-TERM MAN TAILED J. H. Davis Convicted of Swindling Woman Out of \$3.95.

Found guilty of swindling Mrs. E. A. Hoagland, of 282 Third street, out of \$3.95, while representing himself to be a juvenile court officer, J. H. Davis, ex-convict, was sentenced to 60 days in jail yesterday morning by Municipal Judge Steven T. Timony. In the trial disclosed the fact that Davis had been "borrowing" money from local lawyers with a "framed-up" tale to win their interest.

Monday Davis visited Attorneys Wilson, Hart & Shillock in the Gevelinger building, but it is said to have obtained only 25 cents. He was arrested by City Detectives Coleman and Snow. Davis has served three penitentiary terms.

WHEAT TO GO EAST

Over 200,000 Bushels Worked for Rail Shipment.

MINNEAPOLIS IS BUYER

Elimination of Surplus in Interior Will Leave Tidewater Markets Short of Grain—Exchange Sales for Eastern Account.

It is probable that all the surplus wheat left in the Pacific Northwest will be shipped East by rail. Eastern business has developed into larger proportions in the past two days. It is estimated that over 200,000 bushels have already been worked for rail shipment. The purchases have been made mostly for Minneapolis account, but there is also demand from some of the Southern markets.

The sales have been made by Portland, Puget Sound and Spokane dealers, and the shipments will be made from stocks in the interior. In the nature of things, the business cannot become very extensive, as only a small amount of the crop remains.

Should the entire supply in the interior be thus disposed of, it would leave the markets at tidewater short of wheat, as terminal stocks are not large. It is therefore to be expected that the market will be a factor in the market. Fifty-five thousand bushels were sold on the Exchange as follows:

40,000 bushels May bluestem, \$1.15; 10,000 bushels June bluestem, \$1.10; 10,000 bushels June club, \$1.10; 10,000 bushels June red, \$1.10; 10,000 bushels June white, \$1.10; 10,000 bushels July bluestem, \$1.10; 10,000 bushels July club, \$1.10; 10,000 bushels July red, \$1.10; 10,000 bushels July white, \$1.10.
