BRITISH CLINGING

Repeated Counter Attacks by Germans Repulsed, but Battle Still Goes On.

HEAVY LOSSES REPORTED

Paris Reports Continuation of Drive Near St. Mihiel and Capture by Assault of Two Successive Lines of Trenches.

LONDON, April 22 .- Hill No. 60, dominating an area to the southeast of Ypres, continues to be the storm cenof the western front, with the British clinging tenaciously to the ground taken by assault last Saturday. Counter-attack after counter-attack has been so far successfully repulsed, but the British hold is still disputed by the Germans, and the end of the lively and costly fighting is not yet in sight. The British losses have not been announced, but they are estimated at well over 2000. The Germans are believed by the British to have lost more than 4000 men.

The French drive in the direction of St. Mihiel is the only other significant move in the west.

move in the west. German Counter-Attacks Violent.

The official report of the French war office, received tonight from Paris, Says:
"Near Langemerck, to the north of Ypres, the British have repulsed two attacks. At hill 60, near Swartelene, German counter-attacks, whose violence seems explicable by the desire to repair the defeat that has been denied by the official communications of the Imperial German staff, have definitely failed. The lesses of the enemy are higher than the figures indicated yes-

terday.

"In the sector of Rheims there has been an artillery duel.

"In the Argonne at Bagatelle, a German attack of no great importance was repulsed. Near St. Mihiel, in the forest of Apremont, we carried by assault two successive lines of trenches at a place called "The Cow's Head," which formed in our positions the salient that seriously embarrassed us. A large number of German dead were left on the ground; we took 50 prisoners.

"In Alsace we have continued to make progress on both banks of the feebt. To the north we hold the confluence of the Feebt and its left-bank affluent, the Wurmsa; to the south we have reached Schliessloch, thus gaining ground toward the east in the direction of Metzeral."

German Mining Operations Succeed. The German official report, received by wireless from Berlin today, said: "In the western arena, south of La Bassee canal and northwest of Arras, we undertook several successful min ing operations.

In the Argonne and in the region between the Meuse and the Moselle yesterday saw fierce artillery engage-ments. After a surprise artillery at-tack, French forces last night advanced in the western part of the wood of Le Pretre, but they were repulsed with heavy losses. "On the northern border of Hart-mans-Weilerkopf we destroyed a point of support of the enemy and in the evening we drove back a French at-

This morning he witnessed a regi-mental review at Vancouver Barracks. Colonel George S. Young, post com-mander, inspected the review and with Lieutenant-Colonel David J. Baker, attended the club luncheon,

Mr. Johnson also visited the State Schools for the Deaf and Blind, and paid a high tribute to Professor Thomas P. Clarke, Superintendent of the School for the Deaf. He was taken over the proposed right of way for a street car-line east of the garrison, by Henry Crass, president of the Portland, Van-couver & Northern Railroad Company. At the function today C. S. Jackson alled on Vancouver to awake, and do something. He advocated getting the water-front for several miles up and down the Columbia River free from private owners by condemnation pro-ceedings, if necessary, and then to offer to the first man who would accept, a free site for a flour mill that would grind 1900 barrels of flour daily, re-leasing the millowner from paying taxes for 25 years, or so long as he ground 1900 barrels of flour a day. This, he said, would bring many other industries here, and aid the city's growth. He declared Vancouver was fortunate in baying a fine townsite. fortunate in having a fine townsite with an open river in front of it, and 1,250,000 square miles of tributary country and the advantage of terminal rates was also commented upon
