THE LUSITANIA.

By sinking the Lusitania the Germans have shown their determination to destroy the commerce of Great Britain with neutral countries by any means and at all hazards. The loss of many lives, even of neutrals, appears to be matter of no consequence to them; or, if it is of consequence they take the hazard. Until all the

bulk of cargo was contraband, the Germans might hold her as a prize, or in case they could not take her into port without danger to the captor, they could sink her. But first they must give warning to all persons or board to leave the ship and must allow time for this to be done. These are the rules laid down in the Declaration of London, and, though that instrument is not in force, its principles

It is a remarkable triumph of the thorough-going and far-reaching German system, for undoubtedly it was planned days ago to strike just at this time and just in that way at the Lusitania. Else what did the special warnings of the Imperial German Embassy, just before the Lusitania sailed, mean?

The elusive job is on the run And everything 1 look upon But adds its little spiteful store But adds its little spiteful store To grieve my heart and make me sore. Despairingly I almost cry For fellowship and sympathy. Somewhere, sometimes a friendly eye Should greet me as I amble by. Instead I get a sour stare That stabs me like a prickly pear. I hait before a shop or mill. My besom feels a hopeful thrill. This place of jobs I will explore When Io, above the frowning door (And here a chill invades my spine) I see the "No Admittance" sign. The light of hope soes out for me; A gasp, a guip. I turn and flee. GEORGE H. SANDS.
