Doubtless we shall hear from Germany that the attack on the Nebras kan by a submarine was a mistake and the torpedo was intended for an enemy vessel. Yet it is clear that it was fired at a neutral ship.

It is not sufficient for the Germans, or for any American copperhead, to say that the Nebraskan was in the war zone at her peril. The United States has a right to carry on band, with any nation, at this time, or If any American vessel is attacked, it ought to be made clear that it will be at the assailant's peril, not ours. The Winds That Bring Rain. PORTLAND, May 25 - (To the Ed-itor.) - How is the fact explained that the north wind usually brings clear weather and the south wind rain?

This is explained by the fact that sir oming from the north to the south, where it becomes warmer, has its capacity for absorbing moisture increased. Air coming from the south to the north has its capacity for taking up moisture lessened at it falls in temperature, and, when the point of saturation is reached, precipitation occurs. This is, of course, true only in the northern hemisphere. Below the equator the contrary is true
