SELLING BY FOREIGNERS

Canadian Pacific and Rubber Are Weakest Features-Steel Holds Its Own Well-Further Imports of Gold From Canada.

NEW YORK. June 24.—Unmistakable signs of liquidation, mainly for foreign interests, were the conspicuous feature of today's stock market. The decline was accelerated by short selling, caused chiefly by uneasiness across the water.

The uneasiness began at the outset, and gained force steadily, there being at best only intermittent raillies. Canadian Pacific and United States Rubber were persistently sold, offerings of the former being both foreign and domestic. Canadian Pacific's price of the day was 145%, a maximum decline of 3% points and the lowest quotation since 1908. Rubber was offered at steady recessions, with a loss of 8 points, closing at 54%.

Reports dealing with the dividend prospects of these properties were mainly the cause of their weakness. Canadian Pacific's position in this regard has long been the subject of much speculation, and doubt as to the maintenance of the Rubber disbursement from its president.

Next to United States Steel, dealings in Rubber were the largest of any issue, today's sale of 47,000 shares exceeding total sales of that stock for many days. Steel held fairly steady in the face of constant pressure until the final hour, when it recoded.

Reading was the only leader to manifest weakness, but coppers and some of the war shares broke 2 to 3 points. The reversal was quite orderly on a small overturn of business, activity being limited to the first half hour and the close. Total sales 438,000 shares.

Imports of gold from Canada were resumed, another \$2,500,000 being received, making a total of \$50,000,000 from that source since the early part of May. Exchange on London was again fifm, but Paris checks repeated yesterday's low rate of 5.49.

hat foreigners would buy on a liberal scale esulted today in lower prices for wheat ifter an early advance. The market closed heavy at %c to %@20 net decline. Corn heavy at %c to %@le net decline. Corn finished %c to 121%c down, cats off %c to 0%c. and provisions at a loss of 7%c to 20c. Absence of any trace of fresh business with Europe proved discouraging to holders, especially as reports of clearing weather in the Southwest tended to remove chances that trans-Atlantic demand would be aroused by storms interfering with the proggress of the domestic harvest. Attempts to unload showed that the market had virtually been deprived of support. Heavy rains in Kanssa, Oklahoma, Missouri and Nebraska gave the buils unchecked control of the market at first.

domestic crop falled to have more than a
temporary effect.

Outs declined to a new low record for the
season. The possibility was pointed out
that the Government report for July might
indicate a yield surpassing in quantity any
previous total known.

Provisions weakened because of signs of
heavy deliveries on contracts for July perk,
A sharp advance in the hog market was
