

ANTHRACITE ROADS INDICATION

Federal Court Finds No Evidence of Unlawful League to Restrain Trade.

GOVERNMENT LOSES SUIT

Reading Company Held Not to Have Violated Commodities Clause of Hepburn Act; Jersey Central Status Is Not Disturbed.

PHILADELPHIA, July 4.—The United States court for the Eastern district of Pennsylvania today decided that the Reading group of corporations, the Central Railroad Company of New Jersey, the Lehigh Coal & Navigation Company and subsidiary and allied companies are not restrained together in an unlawful combination and therefore do not unduly restrain commerce in the production, sale or transportation of anthracite.

The federal government, which brought the suit nearly two years ago to dismember the alleged combination into separate units and to nullify agreements and leases, wins a point in that the court suggested that the Lehigh & Wilkesbarre Coal Company be divorced from the Jersey Central Railroad.

Court Makes Suggestions. As the subject of the particular separation was not urged in the trial of the case, the court suggested it for the consideration of counsel, when the scope of the decree comes to be determined. The reading ownership of the Jersey Central Railroad is not disturbed.

The court decided that there was no violation by the reading companies of the commodities clause of the Hepburn railroad act, which prohibits a railroad from transporting any commodity in which it has an interest.

The suit is one of the most important the government has brought to break up what it declares to be an illegal combination in the anthracite business.

League to Control Fuel Charged. The government's suit against the Reading group was brought to break up a general suit it filed in 1907 against all the anthracite coal roads. The charge of conspiracy therein was sustained by the Supreme Court, but the government won two material points. It thereupon decided on individual actions against the various railroads, of which the Reading was the chief.

The government asked for the dissolution of what was declared to be a combination of competitors in violation of the Sherman anti-trust law.

It was alleged that this combination was held together by the reading company, which had a capital of \$25,000,000.

It was alleged that the companies were leased together so that they controlled more than 63 per cent of the unmined coal deposits; that they were mining about 26 per cent of the annual production and their tenants 3 per cent additional, and that the railroads were transporting about 33 per cent of the total production. The government further maintained that according to the "generally accepted calculations of geologists and mining engineers, the coal areas controlled by the alleged combination would outlast by many years those of any competitor.

MRS. D. MULKEY INJURED

McMinnville Party at Tacoma in Auto Which is in Collision.

TACOMA, Wash., July 4.—(Special.)—Mrs. D. Mulkey, 40 years old, of McMinnville, Ore., sustained a fracture of the skull last night when an automobile in which she was riding was struck by a streetcar. She was taken to the Tacoma General Hospital where her injuries were said to be serious, but it cannot be determined until she recovers whether or not her skull is fractured. Her right ear was almost torn off.

Mrs. Mulkey was riding with her husband and three children in a party of five. Her husband was driving the car and was struck by the streetcar. The others sustained painful bruises.

Mr. and Mrs. Mulkey and Mrs. Ladd and daughter were visiting Mr. and Mrs. E. F. Messenger during the Montanara Fete. The party had motored here from McMinnville.

AUTO ROBBED OF \$3346

Highwaymen Hold Up Cashier in Street in Broad Daylight.

SAN FRANCISCO, July 4.—Police on horseback in an automobile circled the perimeter below the city and other settled districts of the city and others guarded all the city's outlets in a vigorous search tonight for three robbers who held up and robbed an automobile shortly before noon today in the warehouse district. They escaped with \$3246 in gold and silver.

The auto was driven by James Hartley, cashier of the Pacific Coast Glass Company, and Knauer, a salesman for the company. Both carried revolvers. The money was intended to meet the company's weekly payroll.

The men were forced to dismount and the robbers drove off with the auto.

AUTOIST CAUSES TURMOIL

Men Expelled From Car and One Is Arrested After Fight.

A near riot was staged at Broadway and Washington street last night when E. Stapplemann attacked a party of young men who, according to police reports, had ridden around the block in his automobile. Stapplemann jerked one of the men from the car and the two rolled about in the street while hundreds of eager spectators crowded around the fray.

PARTNERSPEED HOME

T. W. LAMONT HASTENS BY AUTO TO CATCH TRAIN EAST.

Intended Summer Outing at Pelican Bay Cut Short by News of Attempt on Life of Mr. Morgan.

KLAMATH FALLS, Or., July 4.—(Special.)—T. W. Lamont, partner of J. F. Morgan, received word Saturday at Pelican Bay of the attempt on Mr. Morgan's life and at once started to return to New York as fast as automobile and train could carry him.

Mr. Lamont had arrived at Harriman Lodge last Monday to spend the summer with his family, and was out riding when the news of the attempt was received. Mr. Lamont was accompanied by W. P. Johnson, of the Klamath Development Company. He was summoned by telephone to return to the lodge, and after hearing the news prepared to start to return east.

Mr. Lamont drove by auto to Harriman, where he was met by Mr. Johnson, a round trip of 65 miles over wet mountain roads, in three hours.

Mr. Lamont then decided to go by auto to Woodland, California, but was unable to obtain a special train from here. He left here at 6:45 P. M. for Woodland, 46 miles south, over slippery mountain roads, and was accompanied by Johnson, with the intention of connecting with a fast train east from Sacramento tomorrow night.

Mr. Lamont declined to make a statement while here. He received a telegram late today telling of the favorable opinion of Mr. Morgan's condition ascertained by the attending physician.

HOLT RESEMBLES MUENTER

Assassin May Be Harvard Man Who Flew After Wife Died.

CAMBRIDGE, Mass., July 4.—A discovery that Frank W. Holt, who shot J. F. Morgan, bears some resemblance to Eric Sigmund Muentzer, a Harvard University instructor, who disappeared after the death of his wife by poisoning some years ago, has been considered by police officials tonight.

Captain Patrick J. Hurley has sent records in the Muentzer case to New York, and prepared to summon witnesses who knew Muentzer, to make the trip to New York to view Holt.

In the Spring of 1906 Mrs. Leone M. Muentzer died of slow poisoning. Her husband, who had been an instructor in German at Harvard for two years, fled before the authorities could question him and was never apprehended. He was said to be about 35 years old.

VALLEY FOLK CELEBRATE

Woodburn Is Scene of Lively and Patriotic Programme.

WOODBURN, Or., July 4.—(Special.)—The celebration in this city Saturday drew a large number from the surrounding country and the streets were crowded. The parade in the morning was headed by Company I band, followed by the G. B. decorated floats, automobiles, marching school children, who had been drilled by Captain Moshberger, and the Woodburn fire departments, with apparatus. The line of march was to the City Park, where the exercises were held.

The address of welcome was by Mayor Clark and there were introductory remarks by President Poorman. The oration was by Colonel Samuel White, of Portland, who delivered a masterly address, advocating peace, telling of the superiority of the American Republic over the European monarchies and predicting the fall of rulers when the peoples became more enlightened.

The musical programme was under the direction of O. C. Weaver. A ball game in the afternoon between Gervais and Woodburn teams resulted in favor of Gervais by a score of 3 to 0. A water fight in the afternoon department companies and sports on Front street, a band concert and a military ball at the Armory completed the day's programme.

800 WISHBONES ARE KEPT

St. Louis Couple Make Odd Display at Silver Wedding.

ST. LOUIS, June 29.—Eight hundred times chicken and turkey enhanced the dinner of Mr. and Mrs. Fred Grossenbach during the quarter century of their married life. They refrained from the time-honored custom of wishing on the wishbones. So 800 wishbones were on display at their silver wedding in the Blatz Hotel recently.

The wishbones had been dipped in silver and strung about the dining-room on silver-hued ribbons, providing a unique decorative arrangement.

\$10,000 BREAKFAST GIVEN

Woman Says She Pawned Income to Spend on Wedding Morning.

NEW YORK, June 27.—Mrs. Robert C. McCormick, formerly Frances Busby of Philadelphia, continued testimony recently in her separation suit against her husband, a deputy district attorney. She pawned her income for three years to raise more than \$10,000 for her wedding breakfast and trousseau, she testified.

Mrs. McCormick's first husband was Harry Perach, a riding master in a Philadelphia riding academy. They were divorced.

In telling of her second wedding, Mrs. McCormick said: "I knew Mr. McCormick only three months before we were married. I had been married before and it wasn't a success. I wanted my next marriage

TO BE A SUCCESS, AND TO HAVE EVERYTHING RIGHT FROM THE START, I DETERMINED TO HAVE A SPLENDID WEDDING BREAKFAST.

MAN LONG SUBMERGED

INVENTOR REMAINS IN BOX, AIR-TIGHT, SEVEN HOURS.

Remarkable Experiment With Chemicals for Purifying Air May Prove of Great Benefit.

PHILADELPHIA, June 26.—With a little suitcase full of chemicals, for which nations may some time bid fortunes, William Bond, a 23-year-old chemist of Wilmington, Del., climbed into a 36 cubic foot air-tight box and allowed himself to be submerged into a tank of water for more than seven hours, at the end of which time he emerged in good condition.

Professor Abraham Henwood, instructor in chemistry at the Drexel Institute, who witnessed Bond's experiment, said that in his opinion a man could stay in the box approximately four hours without losing consciousness.

The experiment which took place in the Mechanical Engineering Laboratory of the Drexel Institute, and was conducted by Captain Lloyd Bankson, of the Bureau of Construction of Cramp Shipyard; Lieutenant D. N. Fedotoff, the junior naval attaché of the Russian Embassy, and Abraham Henwood, professor of chemistry of the Drexel Institute, was to demonstrate the power of Bond's discovery to purify the air of a room filled with poisonous gases thrown off by the lungs.

According to Captain Bankson, such a discovery, if entirely applicable, would be of immense value in purifying the air in submarines and allowing them to stay submerged for a long period.

The compartment in which Bond ate, worked, read and sweated for almost eight hours was made of thick pine and was divided into compartments. This was placed in a tank of water also made of boards which reached half way up the outside of the compartment. The top of the compartment was an outer casing like the outer shell of a thermos bottle, except that the top was made of glass. A hole in the water on top of the compartment was a manhole, the lid of which was screwed tight after Bond had entered. In this lid was a small window. The advantage of this extraordinary contrivance which seemed to tickle Captain Bankson, was that it allowed Bond to breathe the pure air over the surface of the solution. The solution took up the carbon dioxide and thus purified the air.

Every half hour his friends called him up on the telephone or climbed to the top of the box to gaze at him through the window. Then at intervals they drew out samples of the air by a rubber tube and tested it for the percentage of carbon dioxide.

When the experiment was over, Bond was dripping with sweat. He had been in the box for seven hours and had not drunk a drop of water. He had eaten a light supper and a current magazine a minute later he was sealed in and water was run to the top of the compartment.

Inside of the compartment there was an electric light, a telephone and an electric fan. The apparatus, which consisted of four plates of such can be bought at any notion store. Bond dissolved some of his invention in water and placed it in a glass jar to circulate the impure air over the surface of the solution. The solution took up the carbon dioxide and thus purified the air.

TEXT TO GO HOME

Noted Fight Promoter Tells About South America.

WAR REVIVES BUSINESS

Mr. Rickard, Now Rancher in Argentina, Asserts He Hopes to Make Fortune There and Then Return to United States.

SALT LAKE, Utah, June 29.—"Text" Rickard is in town from South America. He owns extensive cattle ranches in Argentina, but says that when he has made his "pile" he is coming back to the good old United States of America, and, moreover, is going to build himself a home in Salt Lake City.

"I have always liked Salt Lake City, and some day I mean to live here," said the promoter of the Jeffries-Johnson and Nelson-Gann fights. He was chatting in the office of former Senator Thomas Kearns in the Kearns building. "I mean that," continued "Text."

"Light promotions are a thing of the past with Mr. Rickard. He put them behind him when he left Nevada for South America, after the Jeffries-Johnson fight. He did not know the result of the Johnson-Willard fight until he reached New York from Buenos Ayres last week," Mr. Rickard said.

"I haven't followed sporting events much since I left the West," he said. "I was considerably surprised to hear that the war had been beaten by Willard. I didn't think Willard could do it."

"Argentina Wonderful Country." "Text" says it sure seems good to be back in the West again. It gets lonely in the Argentine. There are few Americans in Argentina, but "Text" allows that it is a marvelous country and that it is exciting more and more to him to see the former Westerner do well in the Argentine. The former Westerner does not advise Americans to invade South America, however, unless they have a great deal of money. It is no place for a poor man to go. Continuing on the subject, Mr. Rickard said:

"Argentina is all right for the investor, but the American wage-earner would have a hard time of it. The wages here are not high enough to interest Americans. I brought some American cowboys down there to act as foremen on my ranch. I paid them better money here than they were making here in the West, but they didn't stay. It got too lonesome for them. We have great cattle ranches, though, and since the war has been getting excellent prices."

War Revives Business. "The war has revived business for South America. Times were quiet just before the war broke out."

"Even in the cities there are few Americans. An American club has just been organized in Buenos Ayres, but it only has a membership of about 50."

"Europe will always be the greatest trader with South America, but the United States is doing more business with Argentina, Uruguay, Paraguay and Brazil since the war broke out. These countries are buying all kinds of things in the United States, particularly the goods formerly purchased in Germany. One of the difficulties at the present time, however, is the shortage of steamers between the United States and South America ports. All the stuff that has been bought here can't be shipped."

Europe to Regain Trade. "The United States will establish some permanent trade with South America through the war, but I think that the bulk of it will go back to Europe when the trouble is over. You see, European capital is heavily interested there, and the British, the Germans and the French are there themselves in large numbers. There has been doing business with the South Americans for years, and it is natural that they should continue to do business, such as agricultural machinery and so on, we lead though."

Mr. Rickard said his South American ranches are making good in gratifying shape. He is going back there after he has visited his old haunts in the West and has seen the San Francisco exposition. But when he has made his South American "pile" and gets ready to come home, it is "A Little Gray Home on the West" for him—just the same old home. And he says that Salt Lake City will be the place.

He and Mrs. Rickard are at the Hotel Utah. They will be here for about a week, and will then go on to the Coast. This is their first visit in more than three years.

CANARIES SING IN CHURCH

Feathered Chorus Assists in Children's Service.

WASHINGTON, June 27.—From gilded cages extended from all parts

WILLIAM GOEBEL IN 1899, WHILE MR. GOEBEL WAS CONTESTING W. S. TAYLOR GUBERNATORIAL SEAT.

This announcement will carry more weight than is apparent on the surface, since the Democratic party has been divided, two or three times over efforts to pardon Youtsey, and petitions have been put in circulation, principally by women, asking the States Prison Commission to pardon him.

Youtsey is only one out of more than 40,000 men, arrested for complicity in the Goebel murder. Caleb Powers and James Howard, who were alleged to be most concerned, were pardoned by Governor Wilson, Republican, several years ago.

As Youtsey confessed to his part in the crime, Democrats contend he should be pardoned.

Mr. Johnson offers to withdraw from the race if the Republican or Democratic party puts a state-wide plank on its platform.

WILSON GUARD INCREASED

Secret Service Men Take Extra Precautions to Protect President.

CORNISH, N. H., July 4.—Extra precautions were taken by secret service men Saturday to guard the President. The attack on Mr. Morgan and the explosion in Washington served to make the President's body guards very alert.

Secret service men are now on duty with the President and another is on his way to join them.
