REPAIR JOB IS ISSUE

Upper Washington Street Resurfacing Causes Fuss.

COUNCIL DELAYS ACTION

Permission Granted Property-Owners and if They Fail Highway May Be Shut-Mr. Baker and Mr. Dieck Disagree.

The deplorable condition of pavement in Upper Washington street and the question of who is responsible for re-pairs stirred up a lively fuss at yesterday's meeting of the City Council and in addition to starting proceed-ings for immediate repairs or for the closing of the street brought to Issue the general question of whether the city or property-owners shall pay for repaying streets after the first pavement wears out.

The Council went on record by unanimous vote as favoring granting per-

The Council went on record by unanimous vote as favoring granting permission to the Upper Washingtonstreet property-owners to repair their
pavement if they desire.

If they refuse, it is said the only
course left is for the city to pay for
the work out of the street repair or
general fund or to close the street.
Action one way or the other is demanded by the Public Safety Commission. Street Called Dangerous

Chairman Coffin, of the Safety Com-mission, declared before the Council that the arreet is in absolutely danger-ous condition. He reported that three persons have been thrown out of autopersons have been thrown out of automobiles there recently and have been
severely injured. In addition, he says,
many automobiles and wagons have
been damaged by bumping over the
deep ruts and holes.

A set-to between Commissioners Baker and Dicck followed the declaration

of Commissioner Dieck that the pave-ment is beyond repair.
"I think it can be repaired all right," said Mr. Baker. "The same talk about pavement being too far gone for re-pairs was used in connection with Alder street. Repairs were made, nevertheless, and the street is as good

Mr. Dieck Makes Retort. "Your opinion is not based upon facts," retorted Commissioner Dieck.
"The street is a failure."
"Maybe so, but it doesn't show it," replied Mr. Baker.

"Washington street is beyond repair.
It is two-thirds gone," said Mr. Dieck.
"Washington street can be repaired,"
declared Mr. Baker. "This is an emergency and I am in favor of meeting it as such. That's the whole idea of com-mission government—to get results and get them quick when there is an emer-

Commissioner Baker expressed the opinion that the City Council should establish a municipal repair plant and repair pavement on a systematic basis.
"Take care of them when they first start to go and they will last longer," he said.

Hawthorne Avenue Hole Cited. "There is now a hole in Hawthorne avenue, near Grand avenue, big enough to bury a horse in. This gets bigger every day. With all the system we've got around here we ought to be able

got around here we ought to be able to get it fixed before it gets worse and costs more."

Commissioner Dieck said he had not known of the hole and suggested that Mr. Baker might have reported it.

"Your department is decidedly lax if you haven't known of that big hole, because it has been there some time, and nearly every machine coing that and nearly every machine going that way hits it."

The discussion along this line result-

the discussion along the increase ed in the announcement of Mr. Coffin that his organization, in conjunction with the Automobile Club, will take the responsibility hereafter of reporting all holes of this kind in pavement. The Washington-street proposition was disposed of for a day or two by the granting of permission to the property-owners to make repairs. If they fall it is probable the street will be closed.

MAZAMAS OFF TONIGHT

PARTY OF 57 TO MAKE ASCENSION OF MOUNT SHASTA.

Trips Over Slopes and Into Nearby Country Planned for Two Weeks' Outing-Some Will Visit Fair.

Laden with alpenstocks and various other paraphernalla for the conquest of Mount Shasta, a party of Mazamas, 57 in number, will leave Portland for the south on a special train tonight at 7 o'clock. They plan to pass two weeks in the vicinity of the mountain and will not only climb it but also will explore its various slopes and the surrounding random.

Its various slopes and the surrounding region.

The party expects to arrive at Sisson, the station nearest the mountain, about noon Sunday. After luncheon at Sisson, the journey to the proposed camp site at the foot of the peak will be made, the intention being to arrive in time for dinner.

This will be the second trip made to Mount Shasta by a party of Mazamas. During the early days of the camp side trips will be taken to various sections of the country to enable those of the party not accustomed to the rigors of mountain climbing to get in trim for the ascent.

About a dozen members of the party plan a side trip to Crater Lake on the way back. They will leave the special at Medford and proceed by auto to the lake. They will then go to Klamath Falls, where they will take the train for the rest of the journey.

After the camp is ended, about 20 or 20 of the members will proceed to the San Francisco exposition before returning to Portland.

LeRoy E. Anderson, chairman of the outing committee, is in charge of the Arrangements for the encampment and the details of the trip.

COMPLAINT ILL-FOUNDED

Labor Commissioner Hoff Says Telephone Company Fulfilling Law.

Following a personal investigation, State Lahor Commissioner Hoff yester-day gave the Pacific Telephone & Telegraph Company a clean bill with ref-erence to its treatment of women em-

ployes.

The investigation was begun as a resuit of a complaint filed against the company, alleging it was violating the

company, alleging it was violating the "eight-hour law."

"No eight-hour law for women exists on the statutes of Oregon," said Mr. Hoff, "and there is no violation by this company, either of the laws with reference to hours of employment for women or of the supplementary rulings made by the Industrial Welfare Commission, which forbid the employment of women for more than 54 hours a week."

The white enamel terra cotta on the exterior of our building, supposed to be a comparatively new building material, is, on the contrary, one of the most ancient structural materials, and, according to history, comes to us down through the ages. It is a material that fire cannot burn and water cannot destroy. Triumphantly, it survives frost and mocks at decay.
