DOMESTIC SCIENCE

By LILLIAN TINGLE. PORTLAND, July 14.—Would you kindly give at your earliest convenience some recipe for dainty little cakes suitable for afternoon refreshments? Thanking you in advance. MRS. H. C. F. ALMOST any good, ordinary cake recipe can be used to make tiny "reception cakes" by baking in the small, fancy tins that can be found in great variety in any large kitchen furnishing department. The chief thing is to use a richer than a plain, recipe and be sure to get the individual tins small enough for dainty "French" effect. You can then ice and decorate the cakes in different styles, or leave them plain, as preferred. Or you may bake any cake mixture, including fruit cake, in a sheet about one inch thick and ice and cut in fancy shapes after baking, decorating each small cake with shredded or chopped almonds, halved walnuts, bits of candied cherry angelica, fruit paste or candied peel. Another plan is to bake any preferred cake mixture in a thin sheet, like a wafer mixture, making it a little thicker than usual and spreading it on a cookie sheet with a spatula, as for ordinary wafers. The sheet of cake mixture may be sprinkled with chopped nuts before baking, or cut and decorated after baking. Many fancy cookie cutters are available, but little squares or "fingers" or even diamonds cut with a large knife are much less wasteful. These "wafers" may be put together in pairs after cutting with little jam or fruit paste or icing, or marshmallow cream or Bavarian cream or almond paste may be used on top or not as preferred. Chocolate wafers with white icing are good. Other nice little cakes can be made

thinking we rise to the test. Who has not under the pressure of danger or love or something of this sort done things he dreamed impossible? He was simply drawing upon his reserve, this thought-power latent in him. Why not use it regularly to accomplish cherished ambitions? It is simply a matter of getting at it, of concentrating upon the work in hand, of putting it through more expeditiously, more efficiently and so being able to go on to greater work that is waiting everywhere in the world to be done. The world wants all the good it can get. We are the ones who fail to grasp our opportunity to pass on all that can be ours.

When You Wash Your Hair Don't Use Soap. Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle. The best thing to use is just plain mulified coconut oil, for this is pure and entirely greaseless. It's very cheap, and beats soaps or anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

How to Banish Wrinkles Quickly. If your face is disfigured with wrinkles, no matter what the cause, you can quickly dispel every line, even the most stubbornly clinging, by using a home-made wash lotion. Merely dissolve an ounce of powdered azoelite in a half pint of which has had—its preservative ingredients found in any drugstore. Bathe the face in this, and presto—no wrinkles remain. Believe your own eyes when you look into your mirror and behold the marvellous transformation. The remarkable astringent action of the azoelite so tightens the skin, wrinkles are literally pressed out. Best of all, this result is not purely temporary, for the lotion also has a healthful tonic action, which tends to strengthen and tone up the weakened tissue, and added benefit may be expected with continued use. Use this once a day for awhile; it cannot injure the most delicate skin, the treatment itself leaves no trace—no one guesses the secret of your increasing youthful appearance.—Adv.
