Bethlehem Steel Climbs to 204 and Westinghouse and Can Also Score New Records-Standard Railroads Neglected.

NEW YORK, July 21.—All previous performances for activity and strength in war shales were surpassed by today's stock market, the movement in these issues attaining proportions never before witnessed. Hellishem Sized made the new high price of 204, and Westinghouse at 110% and American Can at 55% cellpsed all former records.

These shares, together with United States Steel, which came within a fraction of its best quotation of the day's turnover, while obscure industrials and equipments contributed another 20 per cent, with gains of two to four points.

The movement was at his height in the final hour, when Westinghouse was in special demand on numerous individual transactions, ranging from 100e to 2000 shares. United States Steel also was abserbed in normous blocks at the same time.

Beading and Canadian Pacific, were nominal at all times, and the pressure directed against these issues at intermittent periods pointed plainty to liquidation with a liberal admixture of short selling. Low-period railroads were seldom quoted at all. Missour, Pacific proving the exception at the new low price of 2%. Total sales amounted to 765,000 shares.

The interesting development of the foreign exchange market was the wankness of frances on the steadier tone of rates on London, a reversal of recent conditions. Dolay in consummating the French credit was assumed to be the cause of the lower rate for Pariscables. The variable state of the international manay market was reflected in a late recovery of rates on Berlin and the Scandinavian countries.

Time money was quetably unchanged, but losas over the year were made at a slight shading from the 3 per cent rate on high-grade collateral.

Ideal conditions for wheat left the market at first with scarcely any support. It seemed as if every house in the trade had selling orders only. The July option, in particular, showed acute weakness, being the most open to attacks based on an increase of receipts from the new crop. Illinois points were reported to be offering wheat freely for immediate shipment, and it was not until prices had suffered a break of more than 4 cents in some cases that the market began to rally. Heavy buying, said to be for France, and reaching an aggreente a 1,000.000 bushels, was the apparent reason for the upturn which followed, but which at no time amounted to a recovery in full Praspects of a bumper yield of Spring wheat structed much attention here. I had suffing expert touring South Daketa tele graphed that all the wheat examined by him was in splendid condition. Another well-known authority sent word from a different section that investigation showed as Spring crop brouble worthy of mention, he added: Thus includes black rust."

Corn parted company with wheat am rose in response to buying die largely to the cool temperatures which prevail and which were said to be retarding the growth, Gray complaints came regarding the crop oution in some parts of the Northwest.

Osts kept within a narrow range. The action of the market was hampered by the conflicting influence of wheat and corn.

Provisions, which at first headed down grade with hogs, were later sheewing decided strength. The raily was laid to sign of a good export demand for means an lard. standing big expert sales. The murket clos
