Typhoid and Typhus Prevented by Vaccination-Abstentious Habits Are Prime Factor in Recovery of Patients.

CONSTANTINOPLE, June 30—(Correspondence of the Associated Press.)—The health of the Turkish troops at the Gallipoli and Dardanelles fronts is good, and the wounded from these theaters of war are well cared for. To this may be added that the Turkish medical staff has shown much resourcefulness, and that the consional payeity of materials and medicaments is met in a spirit one would not expect to find in an organization of which so little good was said during the late

Camp hygiene is well administered in the Ottoman army. Trenches visited were found to be scrupulously clean. The food is well cooked and care is taken that none but good water is given the men for drinking purposes.

Its booths and tents are situated under tall pine trees and are well kept. The tall pine trees and are well kept. The beds, though none too comfortable, perhaps, are scrupulously clean, and the well-being of the patients is promoted by having men from the "working reserves" keep the flies from them with white cloths fastened to long, thin poles. The construction of the booths does not permit "fly proofing" and good ventilation at the same time, and, since the fanning against the flies also tends to keep the men cool, Captain lames Bey decided on the method of fly-chasing employed.

Members of Federal Commission Unable to Agree on Report.

CHICAGO, Aug. 9 .- Friction veloped today in the session of the Federal Commission on Industrial Relations, which is attempting to adopt a report after two years of investiga-tion. Members of the Commission said the greatest source of disagreement was occasioned by consideration of the Rockefeller interests, on which, it was said, there might be three reports. Members of the Commission attempted to compose their differences in executive session, but admitted that a wide divergence of views existed. Professor John R. DO YOU WANT TO GET FAT AND BE

The trouble with most thin folks who wish to gain weight is that they insist on drugging their stomach or stuffing it with greasy foods; rubbing on useless "flesh creams," or following some foolish physical culture stunt, while the real cause of thinness goes untouched. You cannot get fat until your digestive tract properly assimilates the food you est.

There is a preparation known to reliable druggists almost everywhere, which seemingly embglies the missing elements needed by the digestive organs to help them convert food into rich, fat-laden blood. This preparation is called Sargol and much remarkable testimony is given as to its suc-
