

## SAFORD CARRIER INVOLVED AS BREUG Accused Contractor Appears Before Grand Jury, but Testimony Is Secret.

### CONFESSION IS ALLEGED

Supposed Arson Ring Is Being Investigated—Prisoner Is Held in Default of \$20,000 Bail; Case Will Be Tried Soon.

Sanford W. Currier, the building contractor accused as the head of a coast-wide arson ring, was indicted by the grand jury yesterday for setting fire to his house at 888 East Sixty-fifth Street North, August 28, 1912.

The grand jury, in charge of Charles C. Hindman, Deputy District Attorney, has been investigating the arson charges for several days, and reported one indictment to Circuit Judge Gantenben yesterday. Several other men are accused in connection with the alleged arson ring, but only one, Grant Hawley, is under arrest.

Currier is said to have confessed to District Attorney Evans and Deputy Robinson that he made a fairly profitable business of building houses and burning them down. He was arrested on charges of arson, and is held in default of \$20,000 bail. His case will be tried soon.

Other fires said to have been set by Currier or under his direction have been investigated by District Attorney Evans and Fire Marshal Stevens. A large number of these occurred in the Mount Scott or Lents district.

Currier is held in the county jail in lieu of \$20,000 bail. He was arrested three weeks ago after confessions had been obtained from some of his alleged accomplices. His statements there are secret.

The method of operations used by the arson ring was disclosed from statements made by Currier and two other men in California who have not been returned to this state. Currier's alleged confession, which is being kept secret by District Attorney Evans, is said to confirm the statements of the others.

Houses were built, or sometimes only the shells of houses, before they were entirely completed, in some cases, they were insured. A little old furniture, or sometimes merely the metal parts of furniture, were placed in the houses, and the houses were then set on fire. The fire department usually went out to the location where the houses were set on fire, but the houses were usually set on fire in a location where the fire department would not go.

Currier will be tried before Circuit Judge Gantenben on September 20. He has not indicated whether or not he intends to plead guilty to the charges.

## 3 VESSELS BUILDING FOR HAWAIIAN LINE

### New Steamers, to Be Ready for Coast-to-Coast Service Soon, to Call at Portland.

### LUMBER MAY BE CARRIED

Water Shipments From Columbia River Through Panama Canal Reported Growing—Tolls Climb Monthly; Total \$5,216,149.

Three new steamers now being constructed for the American-Hawaiian Line at Sparrows Point, Md., are expected to be ready for service between the Atlantic Coast and Portland and other Pacific Coast ports within a few months, making the trip by way of the Panama Canal. The new steamers are to be operated as an addition to the fleet of vessels already run by that company between the Atlantic and Pacific seaboard, according to local officials of the line.

The vessels, which are all to be freighters, are to be known as the Floridian, Arcturian and Arborea. According to latest information received here the Floridian is to be launched and ready for her maiden trip to this coast December 15. The Arcturian will be completed March 1 and the Arborea May 1 of next year.

The Floridian will be a vessel 114 feet long, 53 feet beam and 31 feet deep.

It is said that the present intention of the company is to operate the vessels as lumber carriers between the Pacific Coast and Atlantic Coast ports. On their westward trips they probably will bring miscellaneous cargoes. Because of having been held up by delays in the Panama Canal the steamers of the American-Hawaiian Line, now en route here from New York, probably will not reach Portland until the last of this month. She was scheduled to make Portland by September 13. The steamer Honolulu, of the same line, is due to set out for Portland harbor October 1, so that the two vessels probably will be here about the same time. They have just got away from the canal en route north.

Other vessels of the line to touch at Portland in the near future are the Iowan, due October 14, and the Panama, due November 6.

There has been a steady increase in water shipments from Portland east by way of the Panama Canal since the opening of that waterway. The regular lines now operating between this port and the Atlantic seaboard by way of the Panama Canal are the American-Hawaiian Steamship Company, the W. R. Grace Company and the Oregon & California Shipping Company.

A steady increase in Panama Canal trade from all ports is shown by the record of business for the first year of regular commercial operations of the waterway as published in the Canal Record. The first year closed August 14, 1915. During that period the monthly collections show a steady climb from \$265,690.80 for the month of September, 1914, to \$273,265.67 for the month of July of this year.

During the year a total of 1317 vessels passed through the canal, carrying a total of 4,596,444 net tons. They paid tolls amounting to \$8,216,149.25.

Lumber and flour taken for Chile exceeds \$140,000.

The steamer John A. Hooper, of the Sudden & Christensen fleet operating between this port and the west coast of South America, cleared last night for Antofagasta, Chile, with 300,000 feet of lumber valued at \$280,000 and 10,000 barrels of flour valued at \$137,767.

The John A. Hooper got into the river Sunday. She was lined on the way up to Portland, and the work of loading the vessel was begun Monday morning. She completed her under-deckload of flour yesterday, and dropped down the river early yesterday to Westport to take on a deckload of lumber.

Advices received at the Merchants' Exchange yesterday, are that the steamer Isabelle, another of the Sudden & Christensen fleet, arrived at Ica from Portland September 12. The Isabelle left Portland August 13 with a cargo of flour.

The steamer F. A. Kilburn, of the North Pacific Steamship Company, got away from the harbor last night en route for San Francisco, and way points. The steamer carries 100,000 net tonnage of 55 and 500 tons of miscellaneous cargo. This consisted primarily of mill feed, flour and canned goods. The steamer also carried a light cargo. Included among the passengers were Mr. and Mrs. J. R. Holman, Mrs. H. Holman, Captain and Mrs. Delbert Shaver and Leonard Shaver.
