Brewing Barley Purchases in Interior Are on Coast Basis of \$25 to \$25.50-Flour Trade Hindered by Lack of Space.

Although the local wheat market continues quiet, business is constantly passing in the country and the prices paid indicate a stendy tone to values. The market is declared to be above the export parity, as based on current cargo and freight quotations, but the buying may be for account of cargoes sold and ships chartered earlier at more favorable rates. the export flour market remains inactive, so far as new business is concerned, because of the congested space conditions. The withdrawal of the Hill steamer Minnesota from the trans-Pacific route was a disappointment to shippers. Sales of flour to the Orient to date are estimated at 15,000 to 17,000 tons for October-November-December loading from North Coast ports, and all the space is now filled. Interior mills participate in the business.

Bradelreets reports exports this week of 7,750,000 bushels of wheat and 117,000 bushels of sales of wheat sgainst 720,000 bushels last week and 160,000 bushels.

Argentine shipments for the week are estimated at 48,000 bushels of wheat sgainst 720,000 bushels last week and 160,000 bushels.

India's wheat shipments this week are 5,814,000 bushels and oats shipments 10,000 bushels.

India's wheat shipments this week are estimated at 10,000 bushels. Terminal receipts, in cars, were reported by the Merchants Exchange as follows:

Great Britain May Impose Heavy Import

There was a report in the hop trade yeasterday, said to be based on cable advices received at San Francisco, that the Britian government is about to impose an import duty of 331-3 per cent on hops brought into that country from abroad.
