A recent issue of the New York Times says:

"Recent researches of Prof. Metchnikoff and others have led doctors to suppose that many conditions of chronic ill health, nervous debility, rheumatism and other disorders are due to poisoning set up by unhealthy conditions in the Large Intestine, and it has even been suggested that the lowering of the vitality resulting from such poisoning is favorable to the development of Cancer and Tuberculosis.

"At Guy's Hospital Sir William Arbuthnot Lane decided on the heroit plan of removing the diseased organ. A child who appeared in the final stage of what was believed to be an incurable form of tubercular joint disease was operated on. The Lower Intestine, with the exception of nine inches, was removed, and the portion left was joined to the Smaller Intestine.

"The result was astonishing. In a week's time the internal organs resumed all their normal functions, and in a few weeks the patient was apparently in perfect health."

The Lower Intestine can never get into this condition if Internal Baths are used. The "J. B. L. Cascade" cleanses the Lower Intestine its entire length thoroughly with pure warm water and removes all this poisonous waste which is such a menace to health.

The Portland Grade Teachers' Asso ciation met in the Library at 4:30 o'clock yesterday. The organization was well represented at the National The league is fast interesting city teachers, but the rural and smaller town teachers are indifferent or afraid. They are such tired, busy people, so widely separated, that the effort of organization seems too great. They cannot know its benefits before organizing, in order to tempt them to organize, or to interest them to become interested in themselves, the league could work out a basic or tentative plan of tenure that would appeal to them as practical. The greatest value of tenure is notice of term and an assurance of a fair hearing. The injustice of the situation is the thing which keeps teachers unhappy, and disturbed.
