Administration Proposes Expenditure of \$50,000,000 to Aid Merchant Marine.

VESSELS TO HELP NAVY

Administration Plan Proposes Construction of Ships of Type Suitable Also as Auxiliaries in Time of War.

INDIANAPOLIS, Oct. 13 .- Outlines of a new Administration shipping bill to provide the United States with Naval auxiliaries in war time and to be used in upbuilding foreign trade in times of peace were made public tonight by Sec-retary McAdoo in a speech to the busi-

ness men of Indianapolis. The new plan, which probably will be presented to Congress at the coming session, proposes appropriation of \$50,-888,888 to be expended by a shipping board to consist of the Secretary of the Navy and the Secretary of Commerce, as members ex-officio, and three members to be selected by the President and confirmed by the Senate.

Government to Hold Stock,

The committe would be empowered to organize a corporation and to subscribe to the capital stock in whole or It would have authority vote the stock belonging to the United States in the election of directors. The directors would choose the officers and employes of the corporation and by that means, Mr. McAdoo declared, they would be removed from political influences.

The board would be authorized to establish steamship lines to countries where American trade needs such accomodation. It might operate ships or lease them to others. It would have power also to inforce navigation rules and regulations, study shipping problems and make recommendations to Congress for legiplation "to encourage and develop a great merchant marine under the American flag."

Through Rates Contemplated.

Further, Mr. McAdoo suggested that shipping board should have authority, acting in conjunction with the high Interstate Commerce Commission, to arrange for special through rates to foreign ports, so American rallroads and steamships might meet foreign commerciation in the markets of the commerciation in the comm

Ship Bill Defended.

American business, Secretary McAdoo said, paid dearly for the failure of the ship bill at the last session of Congress. Increased freight rates to shippers in the last year, he said, "have exceeded several times the \$40,000,000 which the ashipping bill authorized the Government to expend on merchant vessels." Leases, ne said, have been incurred also because of the fact that producers have been unable to ship their produce at all. Mr. McAdoo in declaring that the time had come for the Government to consider the regulation of merchant marine companies did not say that the powers of regulation should be given to the shipping board. He argued, however, that the recent withdrawal from Oriental trade of the ships of the Pacific Mail Company would have been prevented had the ship bill been passed, by the last session of Congress. ATLANTIC CITY, Oct. 6.—More than 250 prominent physicians gathered here for the annual convention of the Ameri-Nation Profits by Neglect.

The essence of preparedness for the Navy is to have these vessels of suitable types and construction where we can put our hands on them quickly. DO THIS FIRST-YOU!

You know, and every physician knows, that when any sickness has organic disturbances, contagious diseases, or even a severe cold, a relapse is feared, because sickness robs the system of Nature's resistance and leaves it subject to lingering germs.

Drugs never build up a worn-out -only food can do that, and the first thing to take after any sickness is the concentrated, blood-making oilfood in Scott's Emulsion, which feeds the tissues, benefits the blood and strengthens both lungs and throat.

Physicians prescribe Scott's Emulsion after sickness. Nurses everywhere advocate it. Scott's is pure medicinal food, without alcohol or drugs. Scott & Bowne, Bloomfield, N. J.
