NEW EVIDENCE IS IN

Manslaughter Charge to Be Made Against Dr. Ausplund.

LETTERS FROM MAN FOUND

Visit to Physician Advised by Logging Camp Employe at Buxton, and His Testimony Sought. Girl's Funeral Is Held.

A complaint charging Dr. A. A. Ausplund with manslaughter, because of the death of Miss Anna Anderson in his office Friday, will be issued by the District Attorney's office this morning. The death of Miss Anderson, who was working on the case, was announced by Detective Royle last night, who declared that new evidence incriminating the physician had been procured as the result of yesterday's work.

Dr. Ausplund, who is now at liberty on \$2000 bail, probably will waive preliminary examination in the Municipal Court this morning and the case will go over to the grand jury, now in session. Mr. Royle said it would be taken up probably within the next two days by the grand jury.

"We will get the case before the jury as soon as possible," he said, "as some of the witnesses for the state desire to leave the city shortly, and we wish to have their testimony."

The detectives today will attempt to get in touch with a man who is employed in a logging camp at Buxton, and who wrote to the girl after the possession of the coroner, and will be turned over to the detectives this morning. Dr. Dammasch telegraphed the man Saturday in an attempt to get him here for the inquest, but received no answer. It is thought probable that he may be able to furnish evidence in the way of letters which he received from the girl.

Miss Anderson's funeral was held yesterday at 2 o'clock at Ericson's undertaking parlors, 455 Morrison street. Rev. J. Richard Olson was in charge of the service, and many attended. Interment will be in Mount Scott Cemetery today.

'UNITED STATES' IS SPOKEN

"English" Language Taboo in German Presbytery.

ST. LOUIS, Oct. 11.—The word "English" and the "English" language are the subjects of the sessions of the German Presbyterian synod at the Second German Presbyterian Church. When a commissioner or visitor does not wish to use the German language he must speak in "the language of the United States."

"That word 'English' is not very popular among Germans just now," said one of the members of the synod. "The talk sometimes heard that the German-speaking churches are losing ground in the United States is without basis. This synod shows, among the German Presbyterians, thirty years ago, at a convention at Galena, Ill., the argument was presented that in a few years there would be no German-speaking churches of the denomination. Instead of decreasing, the German Presbyterians now have six times as many churches speaking the German

language as they had at the time of the Galena convention.

This growth is attributed largely to the use of the German language in the legislative assemblies. German presbyteries were formed separately from the English-speaking ones in 1907 and the two German Presbyterian synods of the country were organized two years later.

BIDDLE ROOKIES SALUTE

Bible Class Leader Honored on His 41st Birthday.

PHILADELPHIA, Oct. 10.—Members of the Drexel-Biddle Bible classes in Philadelphia and vicinity, a company of 100 Biddle "rookies," a brass band and a battalion of the First Regiment gave Anthony J. Drexel Biddle a surprise party on the occasion of his 41st birthday anniversary.

For the last two weeks Mr. Biddle has been one of the most enthusiastic of a company of "rookies" which have been drilling at the First Regiment Army preparatory for a big military training camp which will be opened this month at the Drexel-Biddle Bible Class Home, at Lansdowne.

Mr. Biddle turned up at the armory as usual. The Stetson Field Corps and Auxiliary, garbed in Red Cross uniforms and carrying stretchers, met him with the Union Tabernacle Presbyterian Church band. A full company of "rookies" saluted him with real guns. Three companies of the First Regiment were out in uniform. In addition there were 300 delegates from the Biddle Bible classes. Mr. Biddle grabbed a gun, joined his "rookies" and marched at his own reception.

"We are not preparing for war, but for peace," he told the militiamen. "It is proper that the American people should know about modern war machines, for when they do know they will not be so hasty in urging their Congressmen to declare war in times of stress."

LARGE FAMILIES IS RULE

German Statistics Show 789 Women Have More Than 20 Children.

BERLIN, Oct. 13.—The Prussian statistical office has just issued its last year book, containing details of the last Russian general census, taken on December 1, 1910. According to this there were then in Prussia 7,869,360 married, widowed and divorced women, of whom only 57,519 had no children.

As indicating the distribution of children to a family, it may be mentioned that 23,021 women had 12 children, 42,829 had 13, 27,064 had 14, 16,634 had 15 and 17,327 16 children or more each. As many as 789 women had more than 20 children.

Altogether the 7,850,000 Prussian mothers had given birth to 28,312,289 children, or an average of four children each.

WOMAN ADMITS POISONING

Attempt Is Made to Kill Husband With Candy.

MERRILL, Wis., Oct. 6.—Mrs. Elwyn Webb, a German language teacher, being held here awaiting sentence on a charge of having tried to kill Mrs. Webb's husband with candy, poisoned with strychnine.

After the preliminary examination here they expressed a desire to plead guilty, as soon as they could be taken before Circuit Judge Reid, of Wausau.

Two attempts to put the husband out of the way were made.

"Eat this candy before you go to bed and your troubles with your wife will have disappeared by morning," was the wording of a note which the police say was sent with the candy.

Switzerland normally sells \$2,000,000 worth of cheese yearly to the United States.

FOOD ECONOMY DUE

England Has Campaign On to Educate Public.

APPEAL IS TO PATRIOTISM

To Eliminate Needless Waste Is Desire of Authorities, Who Show Imperative Necessity of Dispensing With Luxuries.

LONDON, Oct. 13.—The imperative necessity of cutting out waste and dispensing with luxuries is being brought home in forcible manner to the British public in a campaign begun by the special Parliamentary war savings committee. Months were allowed to pass before any action of this nature was considered, but the government has realized at last that with the present outlook energetic measures must be taken to offset the tremendous expenditures made necessary by the war and to maintain at the proper level the supply of the first necessities of life for the people of Great Britain.

The result of this movement is that Germany is no longer the only country where the people are being warned not to waste food, and the statements issued by the special committee contain convincing arguments to that effect.

It is pointed out that the great bulk of the food supply for Britain comes from foreign countries, that vast sums of money must be sent out of Britain to pay for it and that vast numbers of ships and men must be constantly employed in carrying it. Every scrap of food that is wasted therefore means a dead loss to the country in money, ships and men. In its latest appeal the committee says in this connection:

"If all the food that is now being wasted could henceforth be saved and properly used the country would have more spare money, more spare ships and more spare men to devote to the war. Each family would have more money to save and invest and the prices of food materials would be kept down."

Possibility of Economy Shown.

"There is another side of the food question in which every one of us can help to strengthen the position of our country in the face of the enemy. We can consume less of certain foods which are more difficult to obtain in full quantities in war time and which therefore rise in price. In the case of some of these—meat, for example—we can replace them in part, at any rate, by other food materials which are cheaper and more plentiful. This can be done without injury to health or strength in any way."

"For the proper nourishment of the body three classes of food are required. The first class are those whose chief use is to produce energy and supply the power to do the work (as coal supplies energy to the steam engine). These are starchy and sugary foods (including cereals and vegetables, such as pomagarine, dripping, etc.). The second class are those whose chief use is to build the structure of the body and repair the waste of muscle, etc., which is constantly taking place. These are the nitrogenous foods, such as meat, fish, eggs, milk, cheese, beans, peas, lentils and the various kinds of nuts. The third class which includes other vegetable and fruits, supply certain salts and other substances which are necessary to the health of the body."

Cheap Foods Specified.

"These three classes of foods should all be present in a well-balanced diet

by choosing these foods which are cheapest and most plentiful in each of these three classes a well-balanced diet can be obtained at the least cost."

Special recommendations are made in regard to the consumption of meat. It is explained that by only the meat supply for Great Britain comes from abroad and is carried in ships equipped with cold storage installations. Since the beginning of the war these ships have been scarce and the result has been the shortage in the supply. This shortage, it is explained, would disappear and the price of meat would fall if every one were to eat less meat than he has been accustomed to, especially during the summer and autumn months. The appeal in this connection says:

"Most people would not suffer in the least in health or strength by so doing, especially if they were to include in their diet a fair proportion of food which can supply the same kind of nourishment as meat."

"Cheese is one of the best and most useful substitutes for meat. Weight for weight, it contains more of this particular kind of nourishment than meat itself. Milk and skim milk also contain this form of nourishment in a high degree. Peas, beans and lentils also contain these properties."

Savings In Bread.

"It is on bread that most of us rely for our main nourishment. Four-fifths of the wheat from which bread is made comes from abroad. Bread is the article which is most commonly wasted of all our food materials, and it is the one which the circumstances of this war require to be most carefully husbanded."

"There are two ways in which bread can be economized without any real stint: (1) By using every crust and crumb of it for food and throwing none of it away. (2) By only using bread which is at least 24 hours old."

"It is impossible to give anything like a complete list of articles, not being articles of food, upon which savings on a considerable scale without loss of efficiency would be possible. All that can be attempted is to give a few illustrative examples."

"Motor cars, cycles, motor cycles and parts thereof were imported in 1913 to the value of over \$5,000,000, motor cars and cycles being valued at \$2,500,000, motor spirit at nearly \$7,500,000. Motor spirit was imported in 1913 to the amount of 100,555,000 gallons, valued at \$2,800,000."

"Motor cars, cycles, motor cycles and parts thereof were imported in 1913 to the value of over \$5,000,000, motor cars and cycles being valued at \$2,500,000, motor spirit at nearly \$7,500,000. Motor spirit was imported in 1913 to the amount of 100,555,000 gallons, valued at \$2,800,000."

"Ornamental feathers were imported to the value of \$2,500,000; ostrich feathers, \$2,500,000, came almost exclusively from South Africa. Skins and furs (not leather), which include seal skins and all ornamental furs, were imported to the value of over \$4,000,000."

BALL PLAYER STEALS MINE

German Explosives Carried Away and Cross Is Given.

LONDON, Oct. 5.—News reached Blackburn recently that Lieutenant W. Cooper, an old Blackburn amateur football player, has been decorated at the front with the Military Cross for an act of remarkable coolness and resource.

He was driving a mine 132 yards long under the German position and had got within a few yards of his objective, when he broke into a German mine crammed with high explosives. For a moment he thought his party was doomed, but he quickly cut the wires leading to the German trenches and sending back for help, proceeded to carry away the enemy's explosives piecemeal.

As the tunnel was very low, he and his men lay head to feet and passed the stuff back from hand to hand. The task occupied 12 hours, there being one ton of high explosives.

No mishap occurred, but five of Lieutenant Cooper's men were rendered unconscious by fumes and four of them received the D. C. M. for their share in this remarkable feat.

10,000 PLANES TO BE BUILT

Elmer Rae Says He Will Have Supervision of Work in Russia.

ST. LOUIS, Oct. 11.—Elmer Rae, of 618 Kingsbury place, has departed for New York, where he expects to sign a contract with an agent of the Russian government to supervise the building of engines for 10,000 aeroplanes for the Russian army, which will cost more than \$100,000,000. He said he expects to sail for Russia within 30 days and will go to work at an aviation base near the firing line.

Rae, who is the son of Edward R. Rae, district agent for the Travelers' Insurance Company, is 27 years old and was graduated from Cornell. He has been studying the building of gasoline engines for several years.

He said he would visit Eastern gas-

KINDS OF RHEUMATISM

In popular language the word rheumatism is a term that covers a multitude of ills of which pain is the chief symptom.

Arterial rheumatism, inflammatory rheumatism and rheumatic fever are all names for the same disease. Muscular rheumatism affects the muscles and does not spread from one spot to another like inflammatory rheumatism. Lumbago is a form of muscular rheumatism.

Some people have rheumatism every winter especially those people who inherit a rheumatic tendency. They will continue to have recurring attacks until the blood is built up to a strength sufficient to overcome the rheumatic poison. External applications and drugs that simply relieve the pain are useless. Dr. Williams' Pink Pills build up the blood and really correct the trouble.

With the poisons in the blood there is a continual combat between the health forces and the disease. When the rheumatic poison prevails the blood gets this rapidly. When the blood is made rich and red by Dr. Williams' Pink Pills the poisons are destroyed and expelled.

The free booklet "Building Up the Blood" tells the whole story and the diet book "What to Eat" will be sent on request by the Dr. Williams' Medicine Co., Schenectady, N. Y. Your own druggist sells Dr. Williams' Pink Pills.

PRAIRIE DOGS MUST DIE

Texas Landowners Compelled by Law to Destroy Pests.

AUSTIN, Tex., Oct. 12.—Prairie dogs are declared to be a public nuisance, according to an act passed at the special session of the Thirty-fourth Legislature and which act is now effective. The act also provides for their extermination, but no bounty is given by the state for eliminating the so-called pests; owners of land on which prairie dogs exist are required under the law to kill them and an allowance of two years is given to such owners to rid their lands of the nuisance.

It is also made the duty of the County Commissioners of any county in which prairie dogs exist to investigate and determine whether owners of lands in their respective counties are destroying such pests the act empowers the Sheriff of the county involved to proceed and destroy the nuisance.

For his service the Sheriff is allowed

\$5 a day for actual service and this sum is to be paid by the County Commissioners, but the amount so paid shall be assessed against the owner of the land and the account or claim entered as a lien against the land in case of failure to pay the amount due the county.

FEET ARE HIS FORTUNE

With No. 19 Shoes Man Hires Himself Out as Human Steamroller.

AMITE CITY, La., Oct. 11.—"Soda," Amite City's heavy-pedaled pickaninny, has left the side show circuit where his big feet were marveled at by the crowds and is now engaged in interstate highway laying. He has many contracts in view.

"Soda" is considered one of the most valuable adjuncts to the art of constructing modern highways. It is said that owing to the boy's large feet he demands the same salary as would be paid for a steam roller.

A shoe factory has made him a pair of No. 19 shoes with thick soles and "Soda" is employed in packing dirt and gravel. He works by merely walking. The boy has a fortune ahead of him. His feet are growing all the time.

MOVIE DEATH SCENE KILLS

Woman Falls Dead Watching Thrilling Flicker Tragedy.

BOSTON, Oct. 10.—As she watched a death scene in a motion-picture theater, Mrs. Florence Lemon, wife of Herbert E. Lemon, a Quincy business man, with a cry fell forward in her seat, dead.

Mrs. Lemon had apparently become excited over a scene in a Western drama, in which the mother of a young outlaw was shown dying from a bullet wound which she received when she tried to shield her son from a Sheriff's revolver.

"CUSTOMER" GRABS GEMS

While Jeweler's Back Is Turned, He Bolts for Street and Escapes.

NEW YORK, Oct. 11.—Morris Shapiro strives to please. He covered the counters in his jewelry store in the Bronx with diamond rings and earrings when a man came in looking for a "nice ring," and when the customer did not appear satisfied, obligingly went to the safe to get more rings.

The diamond earrings, which the customer picked up just before he bolted through the door were valued at \$800. Morris bounded into the street, his shouts attracting the attention of several policemen and a crowd in Third avenue. The thief, however, escaped.

Alabama Considers Sea Wall.

MOBILE, Ala., Oct. 6.—A special

initial steps have been taken at a mass meeting of representative citizens of Harrison County looking toward erection of a sea wall and construction of modern and permanent highways north and south along the coast. Resolutions adopted petition county boards of supervisors to issue bonds and to consider the question of organizing a coastal sea wall association. Federal aid is to be urged.

online engine factories to get ideas before going to Russia. His duties, he said, would consist of designing and supervising the construction of the engine.

Rae says the Russian government intends to manufacture army aeroplanes on an extensive scale and the aviation base where he will work will be the largest in the world.

To the Housewife:

Have you a Pacific Telephone in your home? If not, you are without a real convenience.

—It saves many steps back and forth to your trades people.

—It permits social communication with friends and acquaintances, easily and conveniently.

—It serves the home as a protection in time of danger—husband, father, son, physician, druggist, police are within instant call.

—It saves its cost to you many times over in bringing convenience and pleasure.

—The telephone operator is always on duty and gives you prompt and courteous attention.

43,792 Pacific Telephones in Portland are the connecting links between the home, office and business.

It is a convenience and often necessary for you to be able to talk with your relatives out of town. Our long distance service meets that requirement. Try it—you will be pleased.
