

AUTO IS MADE KING AT PRODUCTS SHOW

Great Crowd Sees Ford Car Assembled in 9 Minutes, 31 Seconds, Record.

SCENIC PICTURES CHEERED

Band Music and Songs, Funny Clowns, Land Products Exhibits and All Sorts of Cars on Display Combine to Please.

(Continued From First Page) many were almost, but not quite willing to pay over their money for their favorite creation.

So far as the entertainment was concerned, the little Ford automobile and Henry Berger, Jr., and Frank J. Jones, owners of the justly famous wonder color picture collection of Columbia River Highway views and other Oregon scenery took the high honors.

Under the eyes of an excited throng E. L. Getz, foreman of the assembly department of the Portland branch of the Ford Motor Company, and his five helpers attached every part of the Ford car together in the record time of 9 minutes and 31 seconds, which is said to be faster time than has ever been made by any other crew in the entire country.

Fred B. Norman Gives Advice. Among the most interested spectators on the inner ring about the workers was their friend and chief-in-charge, Fred B. Norman, manager of the Portland branch of the company, who was ready with an encouraging word every time one of the boys dropped a tool or slipped on a spot of grease.

The Berger-Jones pictures scored such a hit with the audience that they were run twice to give every one a chance to gain admittance to the auditorium, which held more people last night than ever before. As if to challenge Mr. Berger's admission that Oregonians were still "sleeping with the moss," so far as an appreciation of Oregon scenery was concerned, the crowd cheered loudly when the beautiful studies of America's greatest highway and Oregon's flowers and mountain peaks were thrown on the screen with every color and shade absolutely faithful to nature.

During the course of the evening the Ford Band, under the leadership of C. C. Parker, gave selections of classical and popular music and Mrs. Harry McQuade sang several solos.

A. C. Black, chairman of the entertainment committee, estimated that fully 3000 were present, as compared with approximately 1500 on the preceding night. He was also in the presence of the work accomplished in the past, and styled him the liveliest chairman of the show to date. Assisting Mr. McQuade was the following committee: H. L. Keats, Frank C. Riggs, W. C. Garbe, A. W. Strouger, A. B. Manley, W. J. Roope, F. B. Norman, C. L. Bess, H. W. Mitchell, H. E. Hill, W. C. Stillson, C. H. Williams, E. R. Wiggins, J. C. Braly, H. L. Mann, A. P. Goss, G. E. Johnson, H. C. Shinner, C. C. O'Connor, John E. Kelly, James Appleby, Walter M. Cook, George M. Chambers, James Abbott, R. F. Powers, W. J. Clemens, A. D. Fish and C. F. Wright.

Eastern Oregon counties have put a great big share of the punch into the exhibits in the land products section of the Manufacturers and Land Products Show, and their participation this year represents more than half of the land division of the show.

Between \$5000 and \$6000 has been spent by the exhibitors to bring their displays to the show and install them, not considering the initial cost of assembling them. As a result of their activities Portland has assembled this week one of the most complete and agricultural resources east of the Cascade mountains that has ever been brought to this side of the great range.

Object to Reveal Resources. "We're not kidding," said Fred B. Curry, of the La Grande yesterday, "as long as the crowds come out to see the exhibits and to get ready to buy, we like an idea of what the big empire east of the mountains has to offer to the farmer and industrious husbandman."

This was the sentiment echoed in different forms by every other exhibitor from Eastern Oregon counties. Making the round of the land products pavilion, one is impressed especially with the liberal amounts of space taken by the Eastern exhibits, which have, for the most part, laid out the largest booths in the pavilion.

Variety Farm Reproduced. Wheeler County features a one-farm exhibit in its booth in the southwest corner of the pavilion. The display is from the farm of Ivan Stewart, near Fossil, and represents the products of 150 acres in cultivation. A great wheel of grains and grasses, the central feature of the background of the exhibit, The array of grains and grasses displayed comprises 40 varieties of grains and 25 of grasses. In addition to the sheaves of grains and grasses there are threshed seeds and fruit and vegetables. Besides the Stewart display, which is mainly grains and grasses, there are fruits and vegetables from A. H. Akin, of Winlock; H. Stephens and E. M. Clymer, of Fossil.

Dry Farm Products Amaze. Sherman County is represented by the display of the Eastern Oregon Dry Farming Experiment Station. C. E. Hill is in charge. He is assistant superintendent of the farm. Especially fine is the display of forage plants, grains and grasses, and the display of seeds shown in this booth. There are pamphlets noting that the rainfall is only 11 inches per annum, and pointing out the possibilities of dry farming in the county. Corn on the ear and big potatoes are displayed in the center of the booth.

Klamath County relies both on vegetable displays and placards calling attention to the plow land that can be had at \$10 an acre, to the game preserves, power resources and timber production. Mrs. Cora Shook is in charge.

Vegetables Get Most Attention. While grains and grasses are shown in this as in other booths, the features are the fine vegetables, especially onions and potatoes, displayed in the body of the booth.

Cook County was delayed in getting its exhibit in, but completed the dressing of its booth last night under the direction of R. L. Schee.

Redmond potatoes are one of the chief features in the display and there is also an excellent exhibit of vegetable products from the new Tumalo irrigation project land. An array of alfalfa and other forage grasses and plants is shown. The display was assembled under the auspices of the county and is installed in one of the largest booths in the show.

Model Farm Exhibited. One is especially impressed by the grain and grass display in the Walla Walla County booth, where J. R. Leslie presides. These are arranged in shelves on three panels in the back of the booth, and represent at least 40 varieties of grains, grasses and forage plants.

"The richest county per capita in Oregon," says a placard in the booth, and looking over the exhibit one is almost constrained to accept the statement without qualification. A model farm at one end of the booth is a feature that attracts much attention. On the main shelves are exhibits of vegetables, seeds, fruit and nuts. Broom corn also is a striking feature in this booth and there is an overhead display of clover in the central panel in the back of the booth.

On the main shelves are exhibits of vegetables, seeds, fruit and nuts. Broom corn also is a striking feature in this booth and there is an overhead display of clover in the central panel in the back of the booth.

Pictures of Potato Trains Show. "Union County, where farming pays," probably has the most widely diversified exhibit of land products and commercially treated land products in the whole building. Fred B. Curry and Claude Cates, of La Grande, who are in charge of the booth, point out to the visitor that the aim of the exhibit is to exemplify what can be done in farming on a large scale in producing practically every agricultural commodity the state can raise.

They show with pride photographs in the booth of thousands of potatoes shipped from Union County to Kansas and canned products which were grown in Union County and have been put up by some of the most famous canning firms in the country.

Fruit of Every Kind Viewed. Fruit is there in every form, dried, canned, preserved, ranging from prunes to Maraschino cherries. Last year Union County produced 300 tons of cherries that were made into Maraschino.

In the back of the booth is the display of native grasses, the familiar bunchgrass, and the various grasses, representing 100 different varieties. In front are jars of threshed seeds of grains, peas and beans. Union County has the largest single group of cultivated land in Oregon and in the booth at the Land Show it has assembled the exemplification of everything that it produces.

The background of the Baker County booth is set out in great wheels of grains and grasses, and in the foreground are wheat, timothy hay and oats. A big bale of timothy hay, which is exported largely from Baker, is also on display in the booth, and the sheaves of the wheat, and the sheaves of the timothy hay, are piled high with ears in the front of the booth.

Farmers of Malheur County have cooperated in corn-raising, and the number of varieties to only a few, to prevent cross-pollination that might injure the quality of the product, and the results of their cooperation are shown in the magnificent display they have sent to Portland. At the right of the booth are piles of corn, and in the center is a display of alfalfa hay, of a quality, so Mr. Conklin holds, that cannot be rivaled anywhere outside of heaven for sweetness and lusciousness.

Umatilla County has concentrated on grains and grasses and has a big display opposite the Jackson County booth. Opposite the Morrow County booth Gus Miller, of Hood River County, has installed a great exhibit of apples that attract wide attention among visitors to the show.

In the little theater alone they can see motion picture shows all day long, and many of the visitors put in an entire afternoon at that one place, and stay over—on a piece-of-dinner from the various booths—to take in the rest of the show in the evening.

Observing these conditions, the management of the show is taking every measure to provide for the comfort of women visitors during the afternoon, and the numbers who enjoy the "Land Show matinees" are growing larger all the time.

At this time the press of the crowds is never so great as when the special events of the evenings are being held, and in the evening, and women can get them to spend more time in explanation of their wares or in the preparation of samples for the visitors.

Also the demonstrators in the various booths are not so rushed as they are in the evening, and women can get them to spend more time in explanation of their wares or in the preparation of samples for the visitors.

According to Laurgaard's plan, the project, embracing 210,000 acres, would be formed into an irrigation district, with a view of reclaiming all the undeveloped lands. The engineer suggests that the present land holders be organized into a district and their developed and partially developed lands be used as a basis of security in financing the remainder of the project.

REED MAPS INTEREST

CHARTS SHOW COLLEGE'S RELATION TO CITY AFFAIRS. Rapid Gain in Students Through Extension Courses is Depicted and Activities Are Explained.

Reed College is exhibiting a series of maps at the Portland Manufacturers' and Land Products Show, which graphically portrays the services the institution has rendered.

On a large map of the city the places where Reed College students have engaged in social service, where members of the faculty have lectured and where extension courses have been offered are marked by colored pins. Another map locates the 40 pieces of property in the city which are part of the Reed College endowment. Charts, which depict the increase in attendance on the Reed College extension course from 2000 to 15,000 within the last four years and other interesting statistics are shown.

The keynote of the entire exhibit is to show the intimate relation between the college and the city.

Students will be in attendance at the exhibit at all times to explain the maps and charts, answer all questions about the institution and distribute literature.

Dr. Samuel McChord Crothers, of Cambridge, Mass., has accepted the invitation of Reed College to come to Portland next February and give an extension course on 17th century English authors. He also will make a special feature of speaking at the morning chapel and Sunday vesper services of the college.

Dr. Crothers is well known for his essays, many of which have appeared in the Atlantic Monthly and later have been collected in five volumes.

WOMEN VISIT IN AFTERNOON. Number Inspecting Exhibits During Lulls of Day Increasing.

Women seem to have grasped already the idea that the afternoon is the ideal time for them to make a leisurely visit to the Manufacturers' and Land Products Show, and consequently they are to be seen there in daily increasing numbers in the afternoons.

At this time the press of the crowds is never so great as when the special events of the evenings are being held, and in the evening, and women can get them to spend more time in explanation of their wares or in the preparation of samples for the visitors.

Also the demonstrators in the various booths are not so rushed as they are in the evening, and women can get them to spend more time in explanation of their wares or in the preparation of samples for the visitors.

DESERT LAND PLAN IS NEW

Reorganization of Central Oregon Project is Suggested.

SALEM, Or., Oct. 27.—(Special).—Reorganization of the Central Oregon Irrigation Company's project by the Desert Land Board is suggested by D. Laurgaard, a Portland engineer in the service of the State Engineering Department, in a letter received today by Governor Withycombe and transmitted to John H. Lewis, Secretary of the Board.

According to Laurgaard's plan, the project, embracing 210,000 acres, would be formed into an irrigation district, with a view of reclaiming all the undeveloped lands. The engineer suggests that the present land holders be organized into a district and their developed and partially developed lands be used as a basis of security in financing the remainder of the project.

According to Laurgaard's plan, the project, embracing 210,000 acres, would be formed into an irrigation district, with a view of reclaiming all the undeveloped lands. The engineer suggests that the present land holders be organized into a district and their developed and partially developed lands be used as a basis of security in financing the remainder of the project.

THIS MARINE NIGHT

River Clubs Will Rule at Land Show Events.

FRATERNAL DAY IS NEXT

Schoolchildren Will Take Part in Programme Saturday and Prizes Are Offered for Halloween Contests.

This is Marine night at the Manufacturers and Land Products Show, and the First Band of the Coast Artillery Corps will lead the parade from the Chamber of Commerce to the exposition. The program will be at 8:30.

S. S. Hewitt, general chairman of Marine day, announces the participation of the Oregon Yacht Club, Portland and Astoria, Columbia River Pilots Association, river captains, offshore captains, commercial fishing fleet and the gasoline commercial boats. The committee in charge of today's programme follow:

Oregon Yacht Club—Captain Todd, A. J. Ramsay, E. J. Carr, Dr. Jack Yates, Dr. R. M. Emerson, Miles Standish, B. Neaton, C. S. Raynor and T. J. Mendenhall.

Portland Motor Boat Club—Dr. Charles J. Hill, Roy Crandall, Ernest Vonderwerth and George A. Kelley.

Fraternat Day is Tomorrow. Tomorrow brings fraternal day to the exposition. The teams to participate in the fancy drill contest will represent a membership of more than 15,000 people.

Four teams will compete for the cash prize of \$100 for the best drilled team. The second prize is \$50 and the third prize \$25. The fraternal organization selling the greatest number of tickets for fraternal night will receive \$25 and the order the greatest number in proportion to its membership the same amount.

The teams to take part will be Kirkpatrick Council, Ladies and Knights of Security; George Washington Camp, Modern Woodmen of America; Portland Camp, Woodmen of the World, and Multnomah Camp, Woodmen of the World. Each team will consist of 16 people and will be limited to 12 minutes to stage its part in the programme.

The drill will be staged at 8 o'clock in the ballroom, Multnomah Camp, Woodmen of the World, has postponed the weekly meeting Friday and the members will attend in the afternoon.

Prizes offered to students. Saturday will be banner day at the exposition from the standpoint of attendance. Public school children of Portland will be much in evidence, and the band of the Washington High School will be heard in concert. This will be in addition to an orchestra of 150 pieces from the various schools. Folk dances and drills will make up the entertainment for the afternoon.

Halloween night will bring many unusual attractions to the exposition. There is to be a downtown parade and a contest at the show, when the school-boy giving the best imitation of Charles Chaplin will receive \$5. The second prize will be \$2.50. The girl giving the best representation of the Sis Hopkins character receives a first prize of \$5. The second prize in this event will also be \$2.50.

SALEM, Or., Oct. 27.—(Special).—Because the United States has never notified Governor Withycombe that it would assume police and military jurisdiction over Crater Lake National Park, as chapter 6 of the 1915 session laws provide shall be done, it has no jurisdiction there until such notice is given, and therefore the park is subject to all state laws.

This was the ruling today of Attorney-General Brown in replying to an inquiry from the State Industrial Accident Commission as to whether the workmen's compensation act was in force in the park. The Attorney-General holds that the act is in force along with other state laws, until the jurisdiction of the state over the park is relinquished by the Government.

A special meeting of the Fruit and Flower Mission was held yesterday morning and plans made for the Carnation day sale, which is scheduled for November 6. Tags will be sold by the leading Baker players and artists from the vaudeville houses. Motorcars will be provided for the sale, and dozens of young women will be stationed in the hotel lobbies, the corridors of the large office building, department stores and at prominent street corners.

The proceeds of the sale will be used to carry on the work of the day nursery, where from 25 to 50 children are cared for each day while their mothers are at work.

Fifty labels free in Royal bread-cream. Cutout coupon in today's paper.—Ad.

Here's a New BRISTOL HAT that you can count on as being a stylish and popular shape. Shown in two colors, dark gray and dark brown.

\$3—and well worth it. The new Bristol Derbies are well up to the mark in style and value. Also priced at three dollars.

Buffum & Pendleton Morrison Street Opposite Postoffice

BANISHED HIS DESIRE FOR TOBACCO

A Kansas Man Tells of a Simple Home Recipe That Broke Him of Using Tobacco.

Mr. John Miller, living at Waverly, Kas., after using 200,000 cigars, 200,000 pipes, banished his desire for tobacco with a simple recipe which he mixed at home. In a recent statement Mr. Miller said: "I could not stop tobacco of my own accord, so used the following simple recipe almost two years ago and have not touched tobacco since. To 2 oz. of water add 20 grains of muriate of ammonia, a small box of Valerix Compound, and 10 grains of papain. Take a teaspoonful three times a day. As it has no color or smell it can be given secretly in tea, coffee, milk or in food. Any druggist can fill this recipe at very little cost, and it certainly will banish all desire for tobacco."—Adv.
