KEEPING QUALITY FINE

Yield of Leading Producing States Shows Decrease of 37 Per Cent, According to Government Figures -- Storage Grade Scarce.

The favorable turn of the weather welcomed by Oregon onion growers, wh have no fear now of the long keeping of their product. The market at the moment is quiet, but the prospects for the future could hardly be brighter. The smallness of the Eastern crop, which is shown by official returns, is the cause of the underlying strength of values and leads growers to believe that the best prices in recent years will be realized before the season The Government's estimate on the acre

Navels Will Not Be Shipped Until They attain Proper Color.

The navel orange season will be late this year. California shippers will not be permitted to send out their fruit until it reaches the required degree of color, and it is not likely that good oranges will get here before the third week of November. The grape market is very firm. Tokays are scarce and have advanced 25 cents in the South. A car of fine Michigan Concerd grapes is on the market and selling well at 25 cents a basket.

Two cars of sweet potatoes arrived yesterday, also a good assortiment of steamer Navel Stores.
