

The Oregonian

Published daily except on Sundays and public holidays. Entered as second-class matter, October 3, 1881, under post office number 2245, at Portland, Oregon, under special rate of postage provided for in act of October 3, 1917, authorized on July 16, 1911, and extended July 16, 1912, July 16, 1913, July 16, 1914, and July 16, 1915. Accepted for mailing at special rate of postage provided for in act of October 3, 1917, authorized on July 16, 1911, and extended July 16, 1912, July 16, 1913, July 16, 1914, and July 16, 1915. Postpaid in full. Second-class postage paid at Portland, Oregon, and at additional mailing offices. Postmaster: Please send address changes to The Oregonian, P. O. Box 111, Portland, Oregon.

but that knowledge is not comforting to the man out of work, although his vote may have aided in making the conditions...

TRIFLING WITH A COURT.

A Portland newspaper for days loudly emblazoned the "news" that the Supreme Court of Washington would decide an important case in a certain manner. It had "inside information." It "knew" what it was talking about. It scorned the protests of the judges that a decision had not been made; it ignored the justified indignation of a learned and dignified bench that its action was being improperly anticipated. By its conduct in permitting its official secrets to be made known, the whole proceeding, undertaken in the guise of newspaper enterprise, was contemptuous and defiant, and it certainly would have been punished severely if the paper had been within the court's jurisdiction. The justification is a ridiculous which have been heaped upon the rash and mistaken Portland paper by development of the facts is merited; yet it is wholly a consequence of having made a fool of itself rather than of suffering the penalty for its real and obvious offense.

WHAT OF THE BEEMAN DISMISSAL?

It will be recalled that during the somewhat animated discussion over the city budget, Commissioner Daly openly and emphatically disclaimed personal interest in any of the employees in the departments where he thought reductions should be made. His was an attitude of pure and unselfish devotion for economy no matter whom it affected. On December 1, some days after the budget had been adopted, Mr. Daly offered a resolution to cut the salary of the health officer in half. When asked by the Mayor why he had introduced it, he stated:

I learned yesterday that the quarantine officer had been let out without cause and Dr. Marcellus proposes to give a friend of his the position. It looked like the termination. Getting down to the points it was Marcellus' ambition to get even with me. I thought I would give him information. He got upset, but I can say it was very small.

PERUSETH AN UNSAFE GUIDE.

An example of the misrepresentation by which Andrew Furuseth induced Congress to pass the seamen's law is furnished by R. H. Loenholm to the Los Angeles Times. Referring to Mr. Furuseth's statement that Japan has no law providing for the punishment of deserting seamen, he quoted a Japanese law passed in 1939 which imposed severe penalties for desertion. He also said that Japanese steamship companies require seamen to provide sureties against desertion. On the false statement that Japan has no law against desertion Mr. Furuseth based a prediction that, with the La Follette law in operation, Japanese seamen would desert at American ports and be re-employed at the same rate of wages. As Japan abounds in seamen who are glad of \$15 a month, the deserters' advance to \$45 would last for only a single voyage back to Japan. They would then be imprisoned and a new crew would take their places. Having forfeited their bond, they would be unable to get the new bond and would have difficulty in returning to their homes. Knowing this, Japanese seamen would hold their rate \$15 jobs and would continue to keep Mr. Furuseth's clients, nine-tenths of whom are aliens, out of the \$45 jobs which he offers them.

ATTORNEY-GENERAL AND LAND GRANT.

Of more than ordinary interest to Oregon is that portion of the annual report of the Attorney-General of the United States where, in discussing the Supreme Court's decision in the land-grant case, he says: "The attorney-general interprets the grant as not compelling sales by the railroad company, but as requiring all sales made to conform strictly to the terms of the provisions." This is a direct concurrence by the highest legal counsel in the employ of the Government with the construction based upon the opinion by The Oregonian and those in this state who have favored a conference with the railroad company in the hope of obtaining an early sale of the grant to settlers. The sale of the grant is not compulsory. Only when in its own good time the railroad decides to sell does the settler's claim be observed. Then it must sell to actual settlers, in quantities not exceeding 160 acres to any one purchaser and at a price not exceeding \$2.50 an acre. The non-compulsory feature of the grant is an important one. It is the only basis for any recognized proposal of compromise with the railroad. Much cheap clap-trap has been offered in the last few days about the significance of Judge Wolverton's decree in respect to conferences with the railroad. It has been asserted without a shred of truth that prior to the passage of the decree there had been a disposition in responsible quarters in Oregon to recognize railroad ownership of the timber without restriction. The only suggestion of that character has come advanced at the late conference by Mr. Dunne, representing the Southern Pacific, but it received not the faintest favorable echo.

The whole basis of a proposal to compromise, as heretofore stated, has rested on the assumption that Congress cannot compel the railroad company to sell under any terms before it gets good and ready. Attorney-General Gregory has reversed his specific recommendation as to land-grant legislation for the future, but it is hardly to be imagined that he will contend that the Government can add to the enforceable covenants of the grant without the railroad's consent. This is the position which the land-grant company owns the lands. Its title is absolute, with the single exception that when it sells it must sell thus and so. If there is any way that Congress, by legislation, can compel a corporation, against its wishes to sell its land holdings, we have not heard of it. Not only is he for the sale of the grant is not compulsory is not a strong basis for great demands by the railroad company. The right to be dog-in-the-manger does not call for large concessions. But compromise or friendly understanding may be expected from the public standpoint. If the Government should tempt the railroad company with a cash price of \$2.50 per acre for the lands with the intention of converting them into a forest reserve, it would be to Oregon's interest if the railroad would refuse to sell. The state at least can derive some benefit from the grant so long as it is in private ownership.

that he will contend that the Government can add to the enforceable covenants of the grant without the railroad's consent. This is the position which the land-grant company owns the lands. Its title is absolute, with the single exception that when it sells it must sell thus and so. If there is any way that Congress, by legislation, can compel a corporation, against its wishes to sell its land holdings, we have not heard of it. Not only is he for the sale of the grant is not compulsory is not a strong basis for great demands by the railroad company. The right to be dog-in-the-manger does not call for large concessions. But compromise or friendly understanding may be expected from the public standpoint. If the Government should tempt the railroad company with a cash price of \$2.50 per acre for the lands with the intention of converting them into a forest reserve, it would be to Oregon's interest if the railroad would refuse to sell. The state at least can derive some benefit from the grant so long as it is in private ownership.

Complete disarmament by the United States is favored by seventy-two of the pastors. They prefer to risk the danger of invasion rather than chance increasing the country's martial spirit. But 260 preachers enter a positive "no" to this question. Fifty are opposed to any increases in Army and Navy, while 275 stand for a sufficient force to withstand ordinary attack. As to the matter of teaching elementary military science to boys, 215 favor the idea while 91 think that such a course would give the American boy an appetite for war. Military drill of every boy physically able, is the fervent wish of Rev. J. H. Glanville, of Arkansas.

Defense propagandists should be able to gather many epigrammatic utterances from the verdicts on war written by the Presbyterian preachers of the country. Military preparedness is not necessarily opposed to peace, said one. Man is still wicked—it is imperative to make adequate preparation to defend our country from the horrors of the invading foe, said another. Rev. H. T. Dobbins, of California, reveals an interest in the technical details of the armaments of the Brooklyn militant with practical suggestions as to defense plans, laying emphasis on the necessity of providing more submarines and aeroplanes. It may be assumed that the Presbyterian preacher is representative of the general opinion in his views on National defense and ideals. Hence a deduction that the pulpits of the country recognize the need of preparations for defense may be made in all reasonable measure from the evidence at hand. Perhaps the preacher does not preach this from his pulpit, nor is it his duty to do so. The preacher is engaged in regulating the country's morals, rather than its military and naval policies. It is enough that he express himself on these questions when he is asked. The average preacher is an educated man and a thinking man. Take him in the aggregate and he will not go very far wrong, for he has common sense, patriotism and a full sense of the higher duties of citizenship. Which he is charged to preach for no other reason than that he is a minister of the gospel.

The main idea of the municipal Christmas tree in the small city or town is that not a child shall be neglected in the gifts are distributed. Intrinsically the articles are of small value, but to the boy or girl who would otherwise receive nothing his joy cannot be measured. The men and women who give time and money to these affairs are laying by something to their credit.

TAX COLLECTOR SITTER, according to his own story, started so far behind that he was unable to catch up with his shortage, so made it as large as his own and his friends' needs required. Tamaqua must be an easy town.

PREACHERS AND PREPAREDNESS.

What do the preachers of the country think of preparedness? With what sentiments do these guardians of the country's Christian morals look upon the proposed martialing of armed legions for defense? Are they united in pursuing the ideal of peace and do they see in the military armament a stern warning against the training of soldiers? These questions naturally occur at this time; for when the press of the country and the pulpits of the country have been canvassed a fairly good idea may be obtained of the exact state of public opinion.

THE FORD PEACE AMBASSADORS are due for as much glory as the man who spends most of his money going on a transcultural tour and curls up in the day coach coming back.

IS YOUR NAME in the catalogued list of 380,000 tipplers in Oregon held by a wholesale house that is to do business just over the California line? If not, you are at least artful!

HEREFORE the bartenders of Portland have been blessed with Sunday as a day of rest, and soon all the days of the week will be Sundays to them.

GOVERNOR WALSH, of Massachusetts, has rejected an offer of \$15,000 a week from the movies men. They dare not shake that at Bryan.

DR. TUFTS will not be satisfied until "Sunday as a day of rest" is put to the vote of the people, and perhaps not then.

HOW DEARLY the women whose cigarettes have been cut off would like to see Mrs. Murray run for office!

THERE IS a grand chance now to get a kee free if you buy it full of "bozoz."

THE BRIDE'S trousseau is ready, but how about Woodrow? Has he got half a dozen of anything?

THE NEW DON YUAN seems an appropriate title for the Emperor-elect of China.

THE BOY who survives the adolescent days of calf love makes a good man.

HOLLAND will welcome the money the Ford tourists spend, and that is all.

THERE IS a grand chance now to get a kee free if you buy it full of "bozoz."

THE BABY that is left on the wrong doorstep gets a bad start in life.

How to Keep Well

By Dr. W. A. Evans. (Questions pertinent to hygiene, sanitation and prevention of disease, if matters of general interest, will be answered in this column. Where space will not permit the subject is not suitable, letters will be returned unopened. Dr. Evans will not make diagnosis or prescribe for individual diseases. Requests for such service cannot be answered.) (Copyright, 1915, by Dr. W. A. Evans. Published by arrangement with Chicago Tribune.)

How to keep well is a subject that has become very popular in these times of influenza. Every body has heard this explanation of the serious course of some illness. Scissors have been disposed to make light of it, which adverse criticism is not justified. The fact is well established. Growing pains in themselves do not amount to much, but heart disease developing in the wake of growing pains is a serious matter. Streptococci has worked out the scientific principles underlying the onset of complications in a few diseases. In a recent article in the Journal of the American Medical Association shows the mathematical probability of certain complications in certain diseases caused by the streptococcus. It is called a streptococcus. In time it will be universally known that streptococci is only a family name and that the different strains which that family differ in a good deal, but all the facts needed for classifying are not yet in hand. Streptococci are liable to be found in the nose in most people. Scissors have been disposed to make light of it, which adverse criticism is not justified. The fact is well established. Growing pains in themselves do not amount to much, but heart disease developing in the wake of growing pains is a serious matter. Streptococci are liable to be found in the nose in most people. Scissors have been disposed to make light of it, which adverse criticism is not justified. The fact is well established. Growing pains in themselves do not amount to much, but heart disease developing in the wake of growing pains is a serious matter. Streptococci has worked out the scientific principles underlying the onset of complications in a few diseases. In a recent article in the Journal of the American Medical Association shows the mathematical probability of certain complications in certain diseases caused by the streptococcus. It is called a streptococcus. In time it will be universally known that streptococci is only a family name and that the different strains which that family differ in a good deal, but all the facts needed for classifying are not yet in hand. Streptococci are liable to be found in the nose in most people. Scissors have been disposed to make light of it, which adverse criticism is not justified. The fact is well established.
