Federal Chamber of Commerce Says People Will Be Recompensed for Rest.

DIMINISHING

Prople Concentrating More and More on Domestic Affairs-Problem of Unemployment Taking Care of Itself.

WASHINGTON, Jan. 1.—Bright pres-pasts for business throughout the coun-try, in striking contrast with condi-tions at this time a year ago, are plo-tured in a statistics and standards com-mitte report made public tonight by the Chamber of Commerce of the United

Chamber of Commerce of the United States.

"There are localities where such caution and conservation yet remain," says the report, 'and the infinence of high prices for the future further accentuates this cantion because dealers feel that high prices will curiall buying by the consumers. Breadily speaking, it may be said that the spirit of aprinten and hopefulness prevails to a degree that has not been apparent for nearly a decade and the general leading and expectations to for such prosperity during 1916 as will recompense the people of this country for all their past misfortunes.

France War's Effect Leasens.

Fear of War's Effect Leasens.

"The adverse effect of the conflict Europe attlf prevails in come ent-one, though to less extent than at this

time last year.

"There are still scattered fears that the prospecity of this country will be ruised by being drawn into the great arrife, but against this is the fact that the large sertions of the people who are paying less and less attention to the war and more and some conventrating their thoughts and efforts on domestic matters. Beyond this is the striking fact that the influence of the war at present as a whole is more favorable than adverse, because of the tremsticines importes it has given to correin limes of manufacturing, especially east of the Allegheny Mountains, and like-wine to many agricultural products.

Farmers Selling Presty.

Sinch of the prosperity in the grain-Falsing sections is due to the fact that the fartner is selling freely because of remnomerative flavors for his product, and there seems to be no manner of south but that these prices will decline patterfally in case of peace. While filters are many canjectures as to the sussequent effect open husiness of such a centingency, the general helief centers around the conviction that the war will last for some time, and that the part of windom is to make the most of the present extuation, regretable as it is, and not taking under thought of the most of the most of the interest of the interest of the interest of the interest of the most of the interest of the interest.

Consul Garreis reported also that Charles H. Grant, of Boston, another American who was aboard the Persia, was among the survivors. No submarine was seen by the survivors, according to the consul's report, but an officer of the ship said he saw the wake of a torpedo. The Persia went down in five minutes. This dispatch was immediately forwarded to President Wilson at Hot Springs.

While Secretary Lansing tonight declined to comment on the situation confronting the United States, it became aboven that he and other administration efficials were awaiting full information before forming an opinion an determination upon any action.
