Dr. W. T. Foster Says Physical Safety Is Put Ahead of Moral Safety.

### NEUTRALITY HELD "TIMID"

Making of Munitions for Warring Nations Assailed: Interference for Killing of Americans in Mexico Unwarranted.

"Physical safety first; moral safety

Thus was the attitude of the United States toward the belligerents of Eu-rope characterized by Dr. William T. Foster, president of Reed College, in his address before the congregation

Elected in His Place. his address before the congregation of the First Unitarian Church last

Dr. Foster outlined what the actions Dr. Foster outlined what the actions of this country had been since the "International pact guaranteeing the neutrality of Belgium, a pact made at The Hague and to which the United States was a party, had been grossly and brutally violated." He declared that throughout the entire history of the war so far the United States had acted from a purely commercial motive, making no protests when the moral

Neutrality Regarded as Timid.

He averred that we, as a Nation, had done nothing when Belgium was invaded by a hostile army to prevent that invasion, although our moral obcation to maintain the neutrality of Belgium was as strong if not stronger than that of England.

In that same strain came the declaration that when the call to this country came for the manufacture of muni-tions of war, to continue "a war that tions of war, to continue "a war that without our aid in the provision of munitions would necessarily come to a conclusion," we saw only the material gain and "furnished those munitions, reaping the commercial harvest, money got with the price of the blood of Parope." "A fine, supreme, timid neutrality," was the characterization given the exaltation of commercial gain.
"If the public press of the beliligerents is a fair representation of the attitude in which those countries hold the United States," averred Dr. Foster,

the United States," averred Dr. Foster, the United States is the most cordially "the United States is the most cordinaly hated country on the face of the earth. It has furnished food for killing men, we care not what men, when by Federal legislation it might within 24 hours either put under Federal control the making of munitions, thus eliminating private profit, or it might entirely prohibit the manufacture of munitions and these interior the conflict." horten the conflict."

Mexican Policy Defended.

After his arraignment of the policy of this country to take the commercial profits of war, forgetting the moral principle involved, Dr. Foster said that the cry now rending the country for interference in Mexico was a cry for forceful protection of American investment, momentarily obscured by the cry for the protection of American life. He declared that interference in Mexico because of the slaughter of a few Americans, would be the repudiation of a policy that other countries had folpolicy that other countries had for tought not of forceful interference hen a band of Italians were killed New Orleans; nor did China declare ar when a few Chinese were killed

In San Francisco."
Dr. Foster denounced the policy of going to war first and investigating the facts afterward, "a policy adopted at the time of the Spanish War." He aid that the Americanism shouted by Roosevelt was too weak for a Nation that should feel the moral responsibil-ily that he declared it could not avoid.

For the ensuing year the club will have several important propositions: The opening of the railroad bridge to EDWARD A. BEALS, Forecaster,

the use of all railways; the campaign for commission houses to fill up the East Side district between Union avenue and the river, and the erection of the proposed clubhouse. The East Side Holding Company is composed of members of the club and they control the building proposition. About the middle of the year it is expected that the building will be completed and the upper part occupied by the club.

The club has issued a statement of what has been accomplished the past year in locating commission houses on the East Side, and calls special attention to the completion of the Municipal Dock No. 2. It is pointed out that this dock has railway connections with all the East Side tracks. East Side shippers are urged to use this dock.

The Southern Pacific railway has made track connections from East First street so that prompt switching service

A recent issue of the New York Times says:

"Recent researches of Prof. Metchnikoff and others have led doctors to suppose that many conditions of chronic ill health, nervous debility, rheumatism and other disorders are due to poisoning set up by unhealthy conditions in the Large Intestine, and it has even been suggested that the lowering of the vitality resulting from such poisoning is favorable to the development of Cancer and Tuberculosis.

"At Guy's Hospital Sir William Arbuthnot Lane decided on the heroic plan of removing the diseased organ. A child who appeared in the final stage of what was believed to be an incurable form of tubercular joint disease was operated on. The Lower Intestine, with the exception of nine inches, was removed, and the portion left was joined to the Smaller Intestine.

"The result was astonishing. In a week's time the internal organs resumed all their normal functions, and in a few weeks the patient was apparently in perfect health."

The Lower Intestine can never get into this condition if Internal Baths are used. The "J. B. L. Cassade" cleanses the Lower Intestine its entire length thoroughly with pure warm water and removes all this poisonous waste which is such a menace to health.
