## GARRISON RETREATS SOUTH

Invaders Are Disarming Population and Montenegrins Are Said to Be Laying Down Arms and Returning to Homes.

BERLIN, Jan. 24.—(By wireless to Berylin, N. Y.)—Scutari has been occupied by Austro-Hungarian troops, according to an announcement issued today by the Austro-Hungarian headquarters. Several thousand Serbians who formed the garrison retired toward the south without offering any resistance.

The text of the statement follows: "Scutari has been occupied by Austro-Hungarian troops. Several thousand Serbians who formed the garrison retired toward the south without offering any resistance."

"Austro-Hungarians also have occupied Niksic, Danilovgrad and Podgoritz. The disarming of the country has been carried on up to the present without friction. At several places the Montenegrins have not even waited until the Austro-Hungarians appeared, but have laid down their arms before the arrival of the troops in order to return to their homes and to their work."

## DESPERATE BATTLE REPORTED

Montenegrins Have Virtually No Means of Resistance.

LONDON, Jan. 24.—The occupation of Scutari, according to Italian reports, followed on a desperate battle that had been raging for the last two days. As the Montenegrins must have had but little artillery, most of their guns having previously been captured by the Austrians, they virtually had no means of making an effective resistance.

The Austrians in their invasion are now in possession of all the chief ports and towns of Montenegro and in addition the most important trading town of Albania.

Scutari is the most important trading town in Albania and has a population of 20,000. It lies on the east bank of Lake Scutari and has been rebuilt since the earthquake of 1905.

When the Serbian army retreated before the invasion of the country by Teutonic forces some of the Serbian soldiers on crossing the Albanian frontier proceeded to Scutari, where they joined the Montenegrins.

Senator Gallinger, in Retort to College, Says Circumstances Take No Notice of State's Product.

OREGONIAN NEWS BUREAU, Washington, Jan. 24.—When Senator Martine, of New Jersey, makes a political speech in the Senate, he allows his enthusiasm to carry him away, and after the first minute or two he is tramping up and down the aisle, waving his arms wildly and yelling at the top of his small and husky voice. Only the other day Senator Martine found a newspaper story to the effect that the woolen mills of

## GREAT OLD REMEDY FOR SKIN DISEASES

S. S. S. Drives Poison From the System.

Get it fixed in your mind that skin eruptions, Scrofula, Eczema, burning, itching skin, and all skin diseases are due entirely to impure blood. If the trouble was on the outside of the skin, by simply washing and keeping it clean you could obtain relief—not even ointments and salves would be necessary. Agree with us in this belief, and you can be restored to health. S. S. S. is a purely vegetable treatment that you can secure from your own drug store. It is a blood tonic that will purify your blood and cause a decided abatement of your trouble, and finally make you well. Fifty years ago S. S. S. was discovered and given to suffering mankind. During this period it has proven its remarkable curative properties as a blood purifier and tonic. Has relieved thousands of cases of disease caused by impure blood, and chronic or inherited blood diseases. You can be relieved, but you must take S. S. S. Therefore be sure. Don't take chances, don't use lotions. Get S. S. S. from your drug store. If you have a special case, write for expert medical advice to Swift Specific Co., Atlanta, Ga.

Woolsocket had granted their employees a 5 per cent increase in wages. So encouraged was he that he indulged in a particularly enthusiastic discussion of prosperity that has come during a Democratic Administration.

When Senator Martine concluded, Senator Gallinger called attention to the fact that during the last year before the war we exported to Europe woolen goods worth \$4,751,000, while the first year of the war our woolen exports had increased to \$22,057,000, a gain of 574 per cent.

Pendleton Lapses Reach Home After Trestle Is Crossed in Auto—Storm Halts Trains and Ruins Roads.

PENDLETON, Or., Jan. 24.—(Special.)—After walking three miles yesterday through the snow from Weston to Athens, riding in a machine to Adams, this morning bumping the ties of a railroad track for three miles in an automobile between Pendleton and Adams, the girls' basketball team reached home this morning none the worse for its experience.

The team played at Weston Saturday and finding it could not return to Pendleton by train set out to walk. At Athens the girls encountered John Adams, a prominent farmer, who took them in his machine to his home for the night.

This morning Flin Kirkpatrick gallantly took his car and by a roundabout road reached Adams, the macadam road being washed completely out in several places. Returning, Kirkpatrick drove the car over the tracks and trestles for a distance of three miles with his eight passengers.

The members of the team were: Thelma Thompson, Catherine Thompson, Vera Temple, Leta Agee, Alta Metzger, Grace Rugg, Della Ferguson, Christine Christensen and the coach, Miss Caroline Bonney.

## COPPER STRIKE IS ENDED

5000 MINERS IN ARIZONA TO RETURN TO WORK.

Employers of Men Out Since September Refuse to Recognize Union, but Grant Pay Increases.

CLIFTON, Ariz., Jan. 24.—The strike of 5000 miners in the copper districts of Clifton, Morenci and Metcalf, Arizona, which began September 11 last, was definitely terminated tonight, when the former employees of the three operating concerns, the Arizona, Detroit and Shannon copper companies, voted unanimously to return to work under the proposition offered by the managers of the three companies on January 8. Operations, suspended since the strike began, probably will be resumed next week.

Under the agreement the companies recognize no union, but are to introduce a sliding scale of pay, under which the miners will receive, at the present price of copper, \$3.41 per day; carpenters will be paid \$5 per day; machinists and boiler-makers \$5.31 and laborers \$2.50. A grievance committee will meet the mine managers each month to discuss and adjust grievances.

## WILSON MAY DELAY PHILIPPINE LIBERTY

Independence in Not Less Than 2 Years or More Than 4 Is Believed Desire.

## BORAH IS FOR AMENDMENT

Senator Says Talk of Self-Government Is Futile, but That United States Should Cut Loose and Let Isles Save Selves.

WASHINGTON, Jan. 24.—Granting independence to the Philippine Islands in not less than two years and not more than four years may be favored by the Wilson Administration. Senator Hitchcock, chairman of the Senate Philippine committee, discussed with President Wilson late today a provision to that effect which Senator Clarke, of Arkansas, had introduced as an amendment to the pending Philippine bill.

After conferring with the President, Senator Hitchcock, while he would not say what the President had told him, indicated it was probable the amendment would have the Administration's support. He said he would have to talk with other Senators before deciding definitely whether the change would be accepted. The President previously opposed another amendment proposed by Senator Clarke proposing independence for the Philippines within two years.

Senator Hitchcock went to the White House at the request of Mr. Wilson to discuss features of the Philippine bill and the chances of securing its passage in the near future.

## Borah Favors Independence.

Senator Clarke's amendment was the subject of an animated discussion in the Senate during the day. Senators Borah, Republican, and Thomas, Democrat, both expressed themselves as believing the good of the United States lay in cutting off the Philippines as soon as possible. Senator Calt, Republican, asserted that it would be an act of injustice to the Filipinos and a breach of good faith on the part of the United States to grant independence within the time proposed by the amendment.

Senator Borah said he did not believe the Filipinos would be capable of self-government, and that it would be altogether to our advantage to drop the Philippines. "If we stay longer, we are staying for the benefit of the Filipinos, not for the benefit of the United States."

Result is in Doubt. "It is futile to talk of self-government in the Philippines. To my way of thinking, it would be infinitely better to cut loose from them right now and let them work out their own salvation. I believe we should either adopt this amendment or let them know that they cannot acquire the capacity for self-government in 50 years."

Senator Thomas agreed that the islanders were not ready for self-government. "I do not believe that if the United States kept the Philippines for ever with the sole purpose of educating them to govern themselves that we would succeed," he said. "If we could, I do not think there is any question of the duty of the United States involved. Our duty is to let them go just as soon as they are capable of safety and advantage of the United States."

## NATIVES MAY DRINK

Philippine Liquor Law Bars Only Non-Christians.

## AMERICAN DRINKS TABOO

United States Congress Would Stop Sale of American-Made Intoxicants on Islands but Let Brown Men Use Own Vint.

WASHINGTON, Jan. 24.—You have to be a Christian to buy an intoxicating drink in the Philippine Islands—that is, if you are a native. That interesting situation was disclosed in the course of the Senate debate on the prohibition amendment to the Philippine independence bill. The point had been made that no legislation by the American Congress should deny the natives the right to manufacture, sell or purchase native drinks, though a majority of the Senate thought it advisable to bar American drinks from the islands, and so voted.

It was in this connection that Senator Kenyon called attention to the fact that the Philippine Assembly has already passed a law forbidding the sale of liquor to the non-Christian tribes of the islands. "And all that our bill is doing," said Senator Kenyon, "is imposing upon the Christians what they have imposed upon the heathen."

While it may seem strange that the Philippine Legislature would enact such a law, and while that enactment might raise a doubt as to their capacity for self-government, the law in question can hardly be more ludicrous than the prohibition amendment which the United States Senate adopted, barring American beer, whiskies, wines, etc., from the Philippines, while not prohibiting the sale of native drinks, in face

of the disclosure made on the floor of the Senate that the native drinks are much more deadly in their effect. Testimony before the Senate committee was to the effect that vino, one of the native drinks, is so powerful that "if a white man drinks it it sets him crazy." It also was testified that the natives will not drink this concoction, but that they manufacture it to sell to others.

Testimony taken by the Senate committee was to the effect that the Philippine people are not naturally drunkards; that they drink in moderation, and until the advent of the white man they had no harems, and no American liquors. The Senate amendment, if agreed to, and the bill becomes a law, will bar from the Philippines American drinks of an intoxicating quality, but will not interfere with native drinks of all sorts.
